# CAPACITY BUILDING COMMISSION

---

**ANNUAL CAPACITY BUILDING PLAN  
MINISTRY OF HEALTH AND FAMILY WELFARE**

## List of Abbreviations

A/SO	Assistant / Section officer
ACBP	Annual Capacity Building Plan
ADB	Asian Development Bank
AIIMS	All India Institute of Medical Sciences
AIIPMR	All India Institute of Physical Medicine and Rehabilitation
AIISH	All India Institute of Speech and Hearing
AJ-NIFM	Arun Jaitley National Institute of Financial Management
AS	Additional Secretary
ASHA	Accredited Social Health Activists
CBC	Capacity Building Commission
CBHI	Central Bureau of Health Intelligence
CBP	Capacity Building Plan
CBU	Capacity Building Unit
CCD	Continuity of Care Documents
CDSCO	Central Drugs Standard Control Organisation
CGHS	Central Government Health Scheme
CHEB	Central Health Education Bureau
CKD	Programme for Chronic Kidney Disease
CNA	Capacity Need Analysis
CSO	Civil Society Organisations
DCI	Dental Council of India
DDAP	Drug De-Addiction Programme
DMEO	Development Monitoring and Evaluation Office
EMR	Emergency Medical Relief
Esstt.	Establishment
FFSAI	Food Safety & Standards Authority of India
GeM	Government e-Marketplace
GIRHFWT	Gandhigram Institute of Rural Health and Family Welfare Trust
GST	Goods and Services Tax
HMDG	Health Ministers Discretionary Grant
HPE	Health Public Enterprises
IEC	Information, Education and Communication
IGOT	Integrated Government Online Training Platform
IIM	Indian Institute of Management
IMC	Indian Medical Council
INI	Indian National Institutes
IPC	India Pharmacopeia Commission
IPR	Intellectual Property Rights
ISB	Indian School of Business
ISI	Indian Statistical Institute
JIPMER	Jawaharlal Institute of Post Graduate Medical Education & Research
JS	Joint Secretary
JSSK	Janani Shishu Suraksha Karyakaram
JSY	Janani Suraksha Yojana
KHS	Kasturba Health Society
MCTS	Mother and Child Tracking System
MDO	Ministry, Department, Organisation
MGIMS	Mahatma Gandhi Institute of Medical Sciences
MoHFW	Ministry of Health and Family Welfare
MSO	Medical Store Organization

NCAHP	National Commission for Allied and Healthcare Professions
NEIGRIHMS	North-Eastern Indira Gandhi Regional Institute of Health & Medical Sciences
NGO	Non-Government Organization
NHM	National Health Mission
NHSRC	National Health Systems Resource Centre
NIB	National Institute of Biologicals
NIHFW	National Institute of Health and Family Welfare
NIMHANS	National Institute of Mental Health and Neurosciences
NIPFP	National Institute of Public Finance and Policy
NMC	National Medical Commission
NMHP	National Mental Health Programme
NOHP	National Oral Health Programme
NPCDCS	National Programme for Prevention and Control of Cancer, Diabetic and Cardiovascular Diseases
NPCSCB	National Programme for Civil Services Capacity Building
NPHCE	National Programme for Health Care of Elderly
NPPCD	National Programme for Prevention & Control of Deafness
NPPCF	National Programme of Prevention & Control of Fluorosis
PFMS	Public Financial Management System
PGIMER	Post Graduate Institute of Medical Education & Research
PMC	Pharmacy Council of India
PMHRC	Prime Minister's Public Human Resource Council
PMSSY	Pradhan Mantri Swasthya Suraksha Yojana
PNDT	Pre-Natal Diagnostics Techniques
PSU	Public Sector Undertaking
RAN	Rashtriya Arogya Nidhi
RCH	Reproductive and Child Health
RGUHS	Rajiv Gandhi University of Health Sciences
RIMS	Regional Institute of Medical Sciences
RIPMNS	Regional Institute of Para Medical & Nursing Sciences
RMNCAH	Reproductive, Maternal, Neonatal, Child & Adolescent Health
RSBY	Rashtriya Swasthya Bima Yojana
RTI	Right To Information
SS	Special Secretary
ToR	Terms of Reference
WHO	World Health Organisation

# Executive Summary

## 1. Context

The Union Government launched Mission Karmayogi<sup>1</sup>, also referred to as the National Programme for Civil Services Capacity Building (NPCSCB) (the “Programme”), in September 2020. The programme aims to create a professional, competent, well-trained, and future ready civil servants through extensive capacity building. The exercise is based on the philosophy of creating an ecosystem of “competency driven training and human resource management” by transitioning from a 'rules-based' system to a 'roles-based' system. Under this Programme, Capacity Building Commission (CBC) has been set up for functional supervision of civil services training institutions and is currently conceptualizing and developing Capacity Building Plans (CBPs) for over 10 ministries/departments which includes, Ministry of Health & Family Welfare (MoHFW).

## 2. Annual Capacity Building Plan (ACBP)

The Annual Capacity Building Plan (ACBP) is a comprehensive strategic document that outlines key strategic areas that require intervention within the MDO and provides a macro picture of year-wise capacity building initiatives that cater to those areas. The plan is incremental in nature in that it identifies a few focus areas that demand immediate attention and will gradually evolve over time into a full-fledged plan. The plan follows a cyclical process of preparation as it involves working in tandem with all departments, divisions, and zonal / regional offices within the MDO. Usually, under the strategic direction of the leadership of the MDO, the plan is unfolded phase-wise wherein a few departments / divisions are selected for capacity building in the first phase of the exercise.

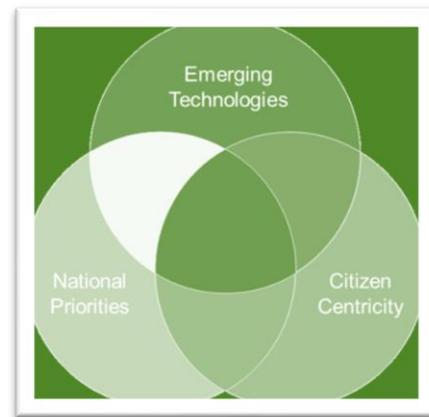

Under the aegis of this highly aspirational initiative, the CBC aims to facilitate the creation of Annual Capacity Building Plans (ACBPs) for all Ministries, Departments, and Organizations (MDOs) of Government of India (GoI) to enhance competency and efficacy at all the levels - individual, organizational, and institutional. Constituted in 2021, CBC is the custodian of the civil services capacity building initiatives and hence oversees the planning and implementation of Mission Karmayogi programme. Under the programme, it is envisaged to prepare Annual Capacity Building Plans which would enable:

- A 21st century civil service machinery that is focused on delivering Ease of Living, East of Doing Business, Citizen Centricity, and Governance Reform at its core.

- A civil service which is aligned with national priorities, and is well apprised and equipped to respond to emerging technologies
- Aligning work allocation of civil servants by matching their competencies to the requirements of the post, enabling a transition from 'Rule-based' to 'Role-based' Human Resource (HR) management framework
- Calibration of civil service positions to a Framework of Roles, Activities, and Competencies (FRAC) approach, to suggest learning content / capacity building intervention relevant to the identified FRAC for different positions
- An opportunity for civil servants to continuously build and strengthen their Behavioural, Functional and Domain competencies in their self-driven and guided learning path.

As highlighted in the image, 'national priorities', 'emerging technologies' and 'citizen centricity' remain the three all the interventions planned by CBC, including the Capacity Building Plans. These lenses have been elaborated below.

'emerging key lenses of Annual elaborated

contributes includes Living etc. (whose capacity achieve

**National Priorities:** This lens examines how the MDO to the national priorities. The national priority lens goals such as USD 5 Trillion economy for India, Ease of The vision, mission, goals, and objectives of the MDO ACBP is being prepared) are studied to ensure that building interventions are aligned towards contributing to national priorities. The ACBP is envisaged to build a roadmap for the concerned MDO to perform its mandate in a more streamlined fashion and build the capacity of not just individual personnel under the MDO, but the overall organization as a whole.

**Emerging Technologies-** The ACBP and the initiative overall should enhance the capacity of civil servants on emerging technologies. To prepare future-ready civil service, this focus area looks to understand the potential impact and challenges being posed by new technology trends in the sector/ domain in which the MDO is operating. The objective of the ACBP is to gauge the capacity the MDO currently has and needs to have in order to respond to such emerging technology trends. Such gaps would be targeted by ACBP to propose relevant capacity building interventions for the MDO.

**Citizen centricity-** The initiative aims to raise a civil service which promotes citizen centricity and customer serviceability as key focus areas. The ACBP exercise will involve examining MDO's key citizen centric initiatives such as – transparent and effective public delivery, inclusion of citizen inputs during policy/scheme formulation, maintenance of effective grievance redressal system, participatory governance etc. Gaps in citizen centric initiatives, if identified for a MDO, will be targeted by ACBP to address using capacity building interventions at individual and organizational levels.

### 3. ACBP for Ministry of Health & Family Welfare (MoHFW)

The ACBP preparation process of Ministry of Health & Family Welfare (MoHFW) (hereby referred to as "The Ministry") began in February 2022 with a kick-off meeting held under the leadership of the Secretary, MoHFW. This exercise is an incremental process, cyclic and developed for phase-wise interventions with actions for each upcoming year. In this phase, training interventions were primarily catered to the equivalent of assistant section officer (ASO) till the equivalent of Joint Secretary level.

The kick-off meeting was followed by a brainstorming session in the month of March 2022 for the benefit of all Heads of Departments. The exercise included several interactions with the leadership of the Ministry. The exercise was initially planned to include 28 divisions. Primary surveys were carried out in a consultative mode and a pre-set questionnaire format method. Consultations were held by way of interviews and workshops and across levels within the organisation, and as decided by the Head of the institution or department. These

activities helped gauge extent of demand of various topics, to chart a unique and position-wise matrix of roles and responsibilities of the officials. The Commission also arranged a day-long validation session in the month of July 2022 to corroborate the training requirements received from the various Divisions of the Ministry. The Commission also exposed the Ministry to the various advancements in the field of medicine and primary health like those undertaken by Wadhvani AI, Meta & WhatsApp, Transforming Rural India Foundation in India (TRIF), PATH India etc. At an individual level, for every unique role at the institution, the competency requirements were identified as:

- (i) Domain competency, which is related to knowledge and expertise related to the sector, division., and the respective focus areas
- (ii) Behavioural competency, which is related to behaviour and soft skills, and
- (iii) Functional competency, which includes cross-cutting needs across MDOs which is related to functional aspects of the division such as administration, financial planning, communication, legal, stakeholder management, technological know-how and other such broad areas of expertise.

The second round of TNA (which was the validation round) exercise was undertaken comprehensively through data collection, consultations, and tabulation exercises with all concerned heads. The insights from both the first and the second round of TNA exercises formed a basis for the annual training plan that is primarily demand based. Furthermore, non-training interventions were also highlighted as part of a holistic capacity building plan and the priority training was signed off by the appropriate authorities within the Ministry. The Ministry envisages implementation of the annual CBP through its Capacity Building Unit (CBU). This unit shall be facilitated by the CBC towards monitoring and evaluation of the implementation exercise.

*Timeline of the activities*

As a part of the ACBP exercise, multiple existing initiatives of the MDO were noted. During the pandemic itself, the Ministry conducted around 30 lakh online training sessions across the country. Some of the prominent interventions undertaken by the Ministry are described in the next section of the report.

#### 4. Existing training and non-training interventions undertaken by MoHFW

The Ministry adopted the whole of government approach as noted for the case of COVID-2019 pandemic and together all divisions worked as a cohesive unit. Illustratively, 11 empowered groups were created, and one national task force was created for technical inputs in March 2020. Few activities pertaining to capacity building, training interventions and mass outreach included the following (these are available as cases and learnings from this can be converted to handle future issues):

- **Capacity building & human resource augmentation:** Filling in required vacancies, creating surveillance teams, which are localised to block level, organising virtual training, creating a network and pool of volunteers and training them using the iGOT platform, making available medical insurance cover of INR 5 million per healthcare worker for COVID services to keep them motivated, opening a wide array of employment generation avenues, assembling an extensive database of skilled and trained individuals including doctors, nurses, allied and healthcare professionals and other volunteers that would translate to better marshalling of available resources, guidelines for proper rotation of deployed workforce which would ensure a system of optimal utilization of health personnel while avoiding burnout, integration of practitioners of Indian System of Medicines and community volunteers to ensure a robust network of healthcare providers down to the grassroots level, and effective use of existing IEC material through various social media platforms to enhance the Govt's capability to effectively harness these platforms were a few of the massive initiatives undertaken by the Ministry. Other activities included coordinating with the private sector, NGOs and international organisations for response-related activities, information, communication, public awareness, public grievances and data management.
- **Support to State governments:** The central Government successfully galvanised a network of 92,000 Civil Society Organisations (CSOs) / Non-Governmental Organisations (NGOs) to assist the state governments and district administrations in identifying hotspots and deputing volunteers, to harness their expertise in key social sectors: nutrition, health, sanitation, education, delivering essential services to the vulnerable, and in creating awareness about prevention, social distancing, and isolation in the community.
- **Real time data for undertaking appropriate measures:** Systems and processes were created in an institutionalised manner to obtain transparent and real time data on number of cases and related mortalities, which was also disseminated to the public on government websites as a positive support atmosphere of competitive performance and learnings among states.
- **Decentralised monitoring:** Decentralisation of monitoring and surveillance were directed through diligent and proactive units at the district level. States set up their 24x7 helplines and every district had its command-and-control centre for any matters related to the pandemic.
- **Tele-consultation platforms:** e-Sanjeevani, a tele-health consultation platform developed by the Ministry's e-health division, has been implemented across 23 states so far and has recorded over 2 lakh tele-consultations as of August 2020. AIIMS set up a 24/7 Telemedicine Hub called "CoNTeC" to connect the entire healthcare community across the country in real time to offer its expertise to doctors requiring necessary assistance.
- **Webinars on pandemic taking together multiple training institutes:** Several webinars on COVID-19 were organized by the expert faculty of various organisations including AIIMS, Indian Nursing Council (INC), NIMHANS, PGIMER, RGUHS, MoHFW among others. Close to 2.14 crore viewership has been achieved on various topics related to COVID-19.
- **Workforce availability:** Workforce availability as per Covid Warrior website was created for real-time availability on ground. Data and coordinates of 1.58 Crore healthcare workers were uploaded on the portal. This was an institutionalised intervention, and measures and learnings from this can be adopted by the states to combat future epidemic and pandemic preparedness.
- **Indian support to other countries:** Through India Health Diplomacy, medicines were provided to 133 countries during the Covid pandemic, technical guidance and supply of logistics (PPEs, masks) was ensured to SAARC countries, and evacuation support was provided to neighbouring countries.
- **Mental health helpline and other support:** Recognising and addressing mental health issues, support such as a 24x7 National Mental Health Helpline number (080-46110007) was launched in March 2020, where nearly 1000 calls were attended per day; and a total of more than 3 lakh distress calls answered. A feature for tracking of healthcare workers making distress calls was added. Toll free tele-counselling was done through SAMVEDNA (Sensitizing Action on Mental Health Vulnerability through Emotional Development and Necessary Acceptance).
- **Leveraging technology through iGOT, ECHO platform, webinars and use of VC platforms for capacity building:** The EG-IV launched an Integrated Government Online Training platform (iGOT),

using the Ministry of Human Resources & Development (MoHRD) platform 'DIKSHA' as a host platform to ensure nation-wide standardized training on flexitime and on-site basis. Close to 150 courses were created with updated knowledge national experts and international findings on seven care-based thematic areas and were rolled out for self-learning by field level professionals. More than 13.50 lakh unique users have registered on these platforms across the country, and more than 30 lakh units of COVID-19 related courses were consumed.

The ecosystem of large-scale training for masses was strengthened. Further initiatives to improve the understanding at the nodal ministry or similar level, especially for public health, can be identified in the future for benchmarking with global standards.

However, these efforts have been largely for officers and others outside the ministry. Within the ministry an institutionalised training program or process was not developed. In view of the same and the emerging issues in public health, needs of training were proposed to be identified. Next section identifies few training and non-training interventions that can be converted as training opportunities.

## 5. Emergent public health issues - Need for training and non-training interventions

India is in a parallel state of socio-economic, demographic, and epidemiological transition. To benefit from an increased labour force and its resources, its citizens need to be healthy and work in tandem with authorities to tackle public health issues. Statistics from various sources inform that India has only 1.5 hospital beds per 1000 population. Health tourism is on the rise with people from US, UAE, Africa and UK coming to India because of the relatively low cost of treatment. The country presently also suffers from the threat of infectious diseases, the challenge of noncommunicable diseases (NCDs), lifestyle changes and coupled diseases, emergence of new pathogens causing epidemics and pandemics. In addition, the health infrastructure is already over-stretched and needs to be strengthened to enable it to confront these challenges in the twenty-first century. According to the sample registration system (SRS) report of Oct 2015, the infant mortality ratio (IMR) is now 40 per 1,000 live births, is higher than the global average at 33.6 per live births. The epidemiological transition is fuelled by the social and economic determinants of health and by some old and some new risk factors such as globalization, unplanned and unregulated urbanization, changing lifestyles, environmental causes (e.g., climate change and air pollution), and increasing influence of media and advertising. Great disparities between the rich and poor and rural and urban divide in access to health services continue to exist in the society. The health-care system is also overstretched to provide equitably for all.

Few training and non-training interventions that may help as opportunities in the larger process can be as follows:

- Learnings from national health policy and an increased investment in health and disease prevention. Information about how progressive states have dealt with lack of information to large chunk of public should be noted and made available to laggard states as one of the training interventions. In this regard, quarterly/semi-annual meetings can be undertaken as one non-training intervention and snippets of learnings can be made widely available across administrators/implementors concerned with the subject at the local levels.
- Benchmarking states should each state develop a state health policy and drive innovation in program implementation and finding solutions to its health problems. These learnings can be culled out at the Ministry level. This should include apt component of quality and quantity in healthcare, especially examples like a guide to remove excess/ unnecessary diagnostics tests and made applicable to private clinics and institutions as well.
- Learning from improvements in service delivery and health systems strengthening- 2019 covid pandemic has taught many learning in online training and in service delivery. These may be cross referenced and best practices can be shared across states and localised to the rural areas. The need

for strengthening research infrastructure with various institutes and partnerships can be explored, especially at the local levels and effort to strengthen their capacity can be undertaken.

- To enhance skill training activities, health can leverage with and benefit from the national skill development mission launched by the Prime Minister in August 2015. Specific interventions may be culled out for implementation.
- Removal of data gaps- for evidence-based policymaking requires data on disease burden and the associated determinants. Generating homegrown data, obtained through surveillance, research, and monitoring and evaluation (M&E), so that these data can be used for policy and strategy development, priority setting, and evaluating the impact. This can be housed in the Ministry through a data lab with the support of statistical officers/institutions.
- Lack of awareness campaigns: Robust systems and processes to create mass awareness was witnessed during the Covid 2019 pandemic. This effort may be institutionalised and mass awareness, especially in rural areas and wherein free treatment can be offered may need to be revisited. Central ministry may create learnings and share with state to share and other benchmarking across the states.
- Lack of health insurance: Low penetration of health insurance has been noted alongside access to health infrastructure. As per estimates, around 75% of the population pays from its own pockets and can be huge financial burden. Policy and training around may need to be one non-training intervention in upcoming years.
- Leveraging technology to transform public health- Mobile technology to connect remote areas with national centres of excellence or patients in villages with doctors in hospitals in urban areas through audio or video conferencing. The government is already establishing a network of telemedicine services, mother and child tracking system of weekly voice messages to pregnant women and new mothers, web-based TB registration scheme called Nikshay, and planning mobile app for the training of Accredited Social Health Activist (ASHA) workers. Space research is another area to explore.
- Lastly, empowering health leadership and governance. Most risk factors for ill health lie outside of health sector. To combat these risk factors an intersectoral and interdisciplinary approach may be required. For a country that has a vibrant civil society and private health sector and an advanced pharmaceutical and biotechnological research capacity, these attributes should be leveraged for the benefit of public health including incentives to innovative technologies and research. Besides policy, the programs also should have inbuilt mechanism to ensure transparency and fix accountability. Issues in poor implementation and cases of/learnings from progressive implementation can be noted and made widely available at local levels.

## 6. Quick Wins for Ministry of Health & Family Welfare (MoHFW)

The first round of Training Needs Analysis (TNA) exercise resulted in the identification of some 'quick wins' critical to the Ministry and those training are being arranged/being arranged on a priority basis. The Commission organised a stress management and mindfulness session for the benefit of senior officials at the Ministry. The Commission has already arranged for first cohort of inter-ministerial 5-day training at Institute of Secretariat Training and Management (ISTM) between September 5-9, 2022, on functional competencies. These training are pilots and can be updated/ modified based on feedback from participants. These inputs are crucial to be provided to improve the training outcomes. The Commission is also organising a workshop with Microsoft & Ministry of Skill Development & Entrepreneurship (MSDE) on 'Microsoft 365 Productivity Suite Training' for government officials. The larger objective of this training is to enhance the functional computer literacy of nearly 2.5 million civil servants of Government of India (GoI). The project will digitally empower officials to provide efficient and effective citizen centric services to the vulnerable and underprivileged sections of the society. It will enable them to deliver last mile social welfare services.

## 7. Macro picture of Training Needs Analysis (TNA) exercise

A five-step need analysis process was followed for undertaking the TNA exercise, as follows:

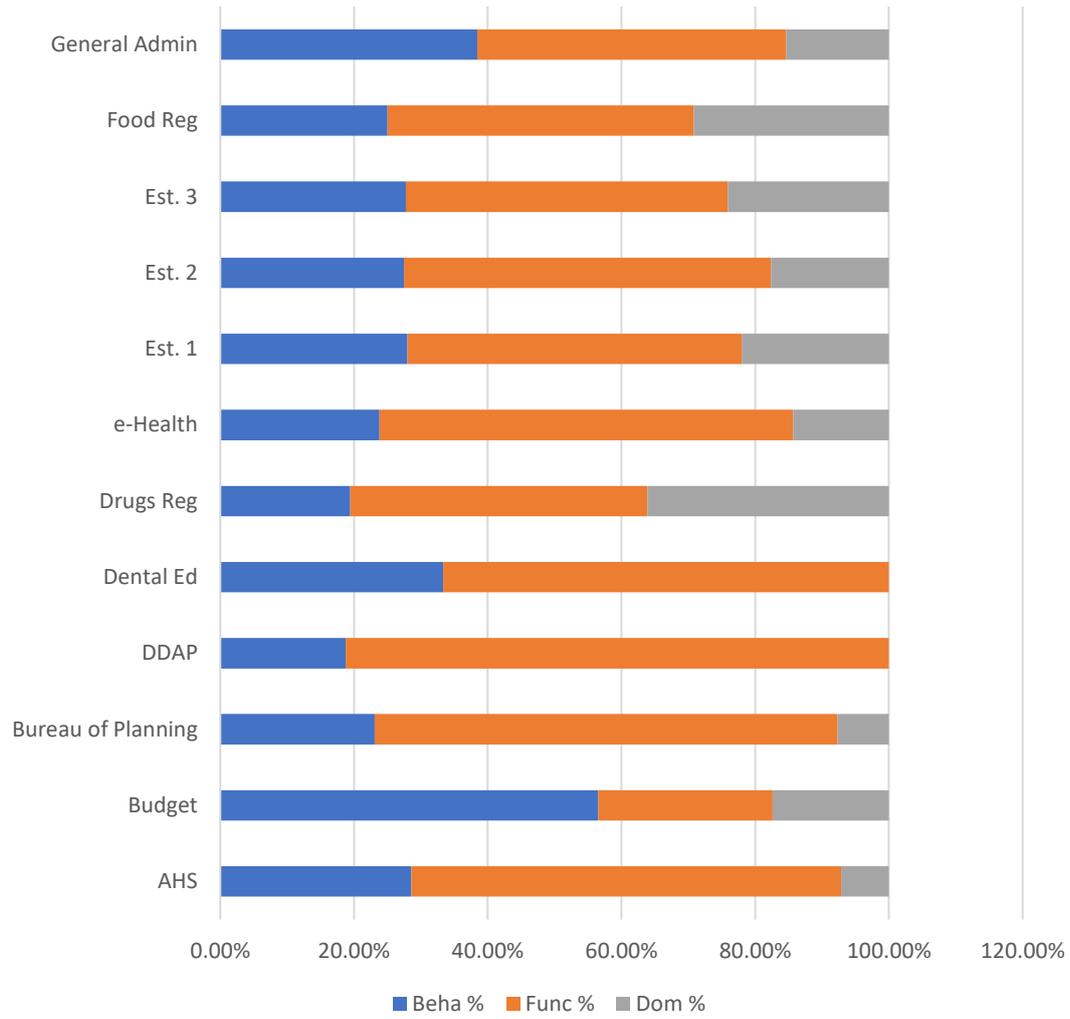

For undertaking the ACBP exercise, the following definitions were adopted to cull out competencies across divisions:

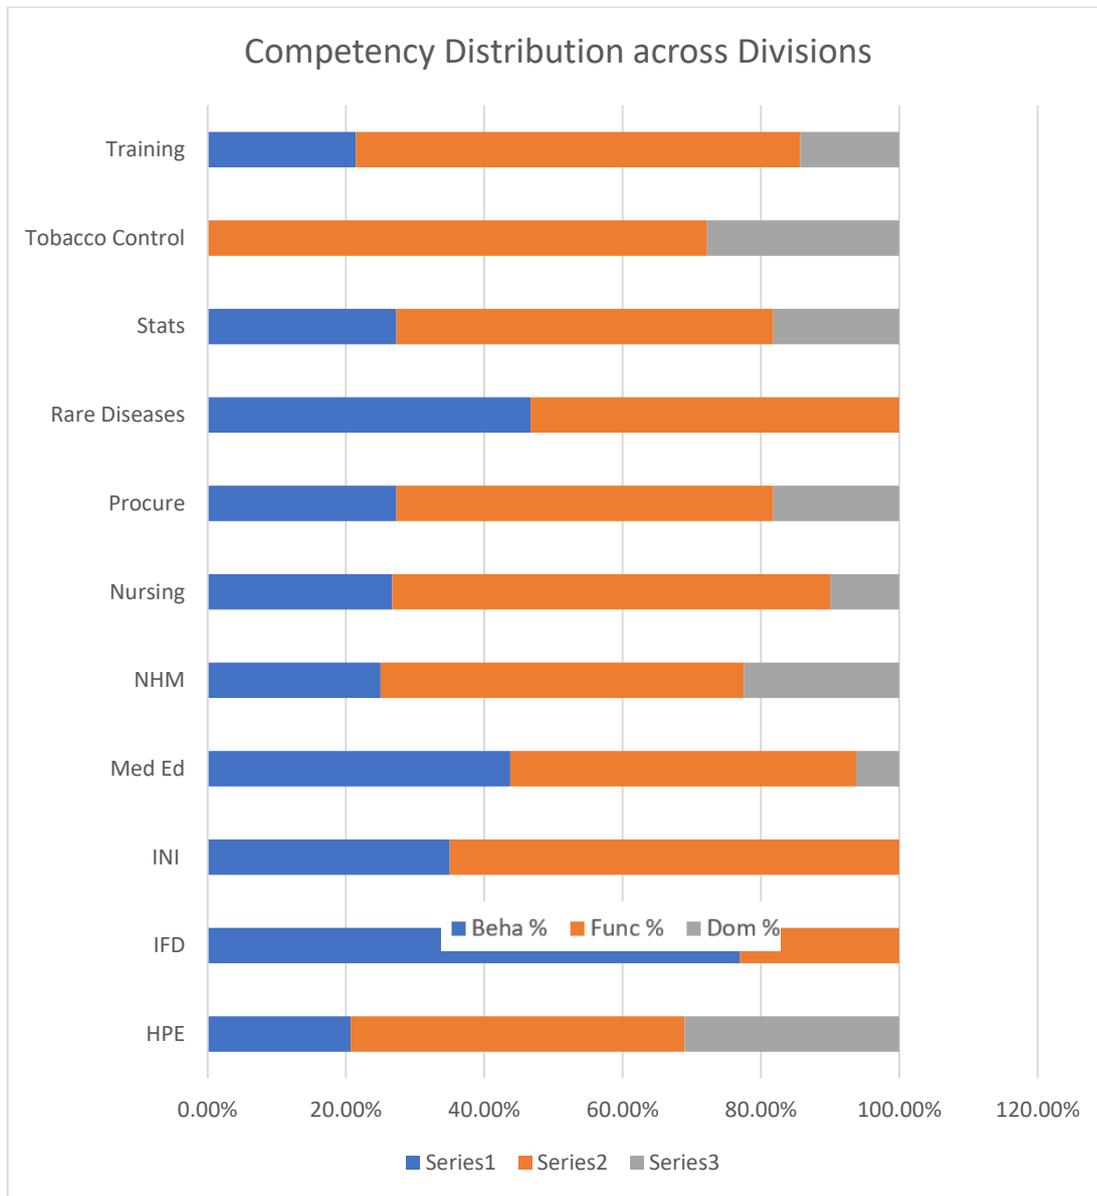

- Domain competencies areas are specialised skills and specific to roles in and for MoHFW (for example, Understanding Acts, policies, schemes, programmes related Health & Family welfare, safety, etc., data analytics for programmes, schemes, Global best practices in Health & FW, etc).
- Functional competencies are operational requirements for the Department/ vertical/ Ministry towards seamless work or operations or cross-cutting requirements across divisions/departments. For example, procurement, GFR understanding, project management, budgeting, communication, establishment matters, skill development, social security aspects, direct beneficiary transfers etc. These may be common competencies areas across many Ministries.
- Behavioural competencies are a set of attitudinal or soft skills that are required to enhance the performance of a given role. These competencies can be displayed (or observed/ felt by stakeholders or beneficiaries) across a range of positions or roles and functions within MoHFW. For example, Initiative, Information Seeking, Empathy, Self Confidence, communication skills, written communication improvements, professionalism and attitudinal changes to serve the citizen centric goals, etc.)

### 7.1. Training sought across competencies

The distribution of the various competencies (domain, functional, behavioural) for each division can be viewed below. In Year 1, respondents quoted training need largely for functional areas. Specific divisions such as drug regulation, tobacco control, HPE etc. sought to know more about the domain aspects.

## Competency Distribution across Divisions

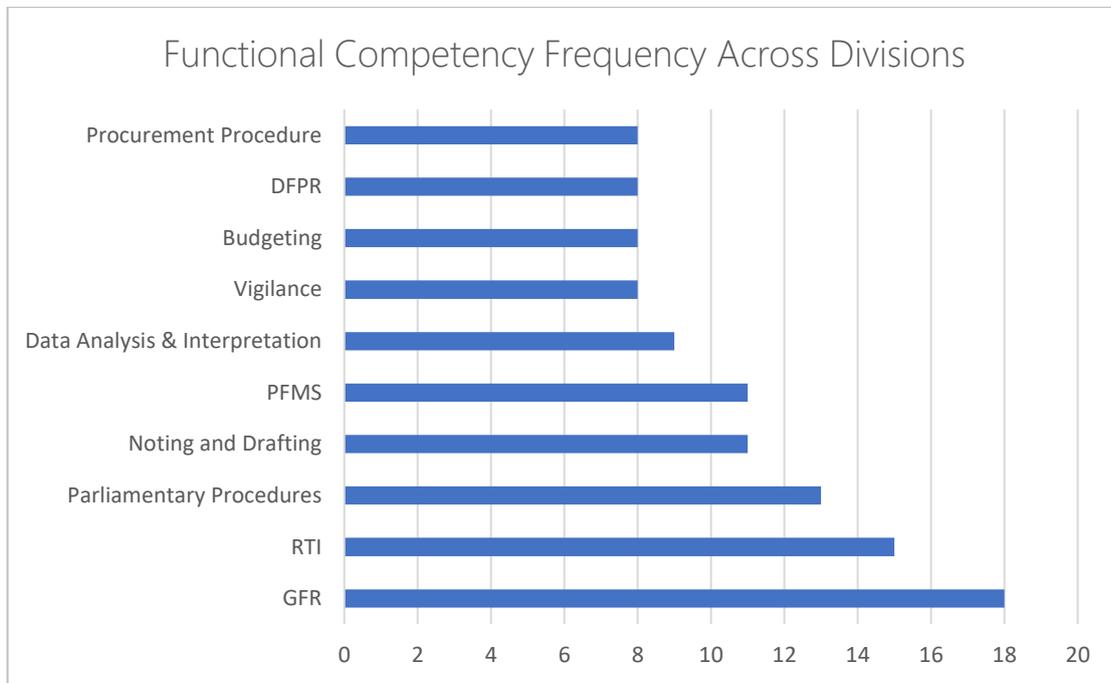

Source: Training needs survey, MoHFW

## 7.2. Functional training sought

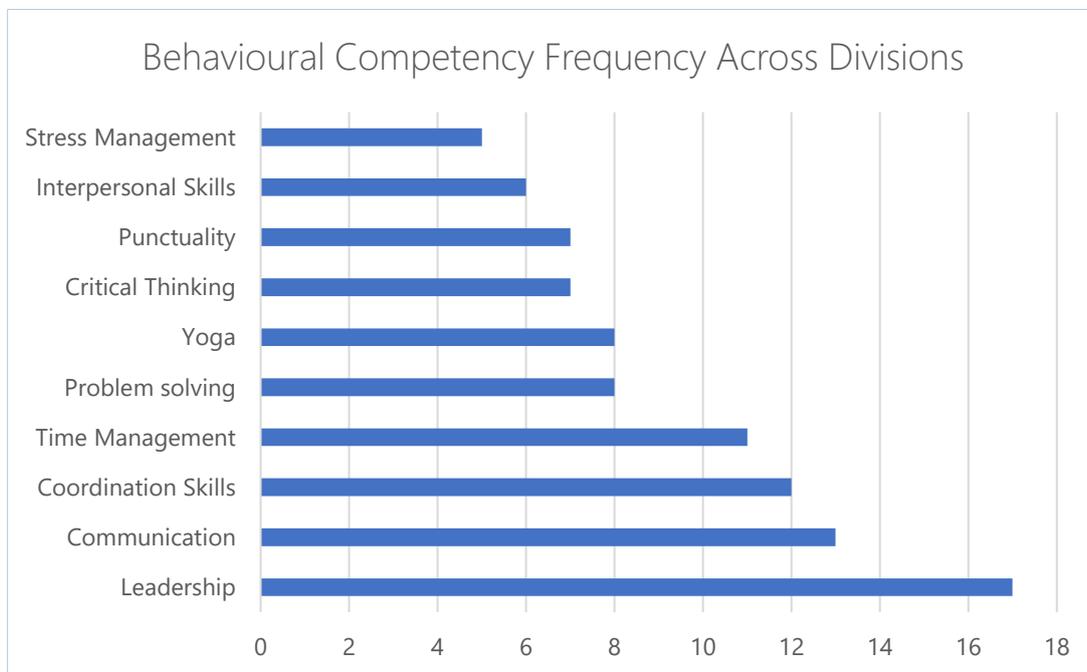

The chart below showcases **top 10 functional competencies** sought by respondents across divisions. Maximum respondents sought to refresh GFR related knowledge followed by updating skills on Right to information (RTI) matters, parliamentary procedures, noting and drafting and Public Financial Management System (PFMS).

Source: Training needs survey, MoHFW

### 7.3. Behavioural training sought

The chart below showcases **top 10 behavioural competencies** sought by respondents across divisions. Maximum respondents sought to train on leadership aspects including communication and coordination skills. Well-being aspects covering stress management, conflict management, health management, times management combined was another well sought topic.

Source: Training needs survey, MoHFW

### 7.4. Domain training sought

Domain competencies are usually specific to each Division based on its responsibilities. However, some domain competencies that were requested by respondents across multiple divisions are provided below:

#	Domain Areas
1	Global best practices in H & FW
2	Global best practices in Health IT
3	CSS architecture of NHM, PM ABHIM
4	Scheme related training (PMJAY, NHM etc)
5	NHM Dashboard
6	Medical Education Rules & Legislations (NMC Act, INC, Act, PCI Act etc.)
7	Regulations (FSSAI, regulatory bodies etc.)
8	Orgs (Central Drugs Standard Control Organisation (CDSCO), National Institute of Biologicals (NIB), Indian Pharmacopoeia Commission (IPC))
9	National List of Essential Medicines
10	Large Scale Survey Design, Roll-out, Analysis, Evaluation, Official Statistical System
11	Company Act & Corporate Governance (reg. PSU (HPE section) – reading balance sheet & accounting, bonus share, dividends, board agenda, disinvestment)

## 8. Training Calendar

The outline of the training plan that can be implemented by the CBU in tandem with training partners is provided below. The training plan outline covers the needs captured in the TNA as mentioned earlier (in terms of functional, behavioural, and domain priorities) by the respondents and Division Heads for the Year 1 (2023-24). 54 competencies / course areas have been finalized based on immediate demands, and a few course areas have been bundled together to enable implementation based on topics and courses under provision by various institutions. These courses / training will be **mandatory** for the level of the Target Group they pertain to. Trainings identified as “online” or “offline” will be entirely online or offline respectively. “Hybrid” trainings will have aspects of online as well as aspects of field immersion.

For the courses that are not yet ready and need to be designed, the CBU of the MoHFW will decide the various aspects of the training module, such as the training partner as well as the cost implication on the MoHFW’s budget by Q3 of 2023-24.

**Table: Training plan Outline across division based on training needs analysis exercise**

#	Course name & specifications	Target Group <sup>1</sup>	Proficiency level: Basic / Advanced	Mode (Online / Offline / Hybrid)	Duration	Knowledge Partner	Category	Proposed training Quarter (Q)
<b>Common across all Divisions</b>								
1.	<b>Microsoft Suite</b> <ul style="list-style-type: none"> <li>• Microsoft Office</li> <li>• Microsoft Word</li> <li>• Microsoft Excel</li> <li>• Microsoft PowerPoint</li> </ul>	All officials	Basic	Online	60 hours	iGOT	Functional	Q1 – Q4 (round the year)
		US and below	Advanced	Online	60 hours

## 9. Conclusion

In the first iteration of the capacity building exercise, many critical, long-term and futuristic competency topics were identified that needed attention and intervention. Although these competency topics cover domain, functional and behavioural competencies, our macro picture analysis showed that the institutes and divisions were more aligned towards Functional competencies. Functional competencies such as General Financial Rules (GFR), Delegation of Financial Powers Rules (DFPR), FR / SR, Legal & Parliamentary matters, Noting & Drafting, Microsoft applications (Word, Excel, PowerPoint), Data Analysis etc. were few of the many intervention areas identified for the short term. These functional competency training are arranged in such a manner for the employees to interact with their colleagues from other ministries / departments. Futuristic competency topics have also been identified from the exercise such as global practices in Health & Family Welfare, Health IT, Nursing, CSS architecture of various schemes such as National Health Mission (NHM), PM ABHIM, training on schemes and medical education rules & regulations (NMC Act, INC Act, PCI Act etc.). Accordingly, the ACBP for the MoHFW is prepared based on the requirements of domain, functional and behavioural competencies on an individual level as well and institutional and technological requirements at an organizational level, meeting the overall objectives of the Ministry.

Beyond Year 1 (2023-24), the training shall focus on higher order aspirational aspects that have been captured within the TNA (along with further feedback to be received from the Division Heads), comprising of aspects such as:

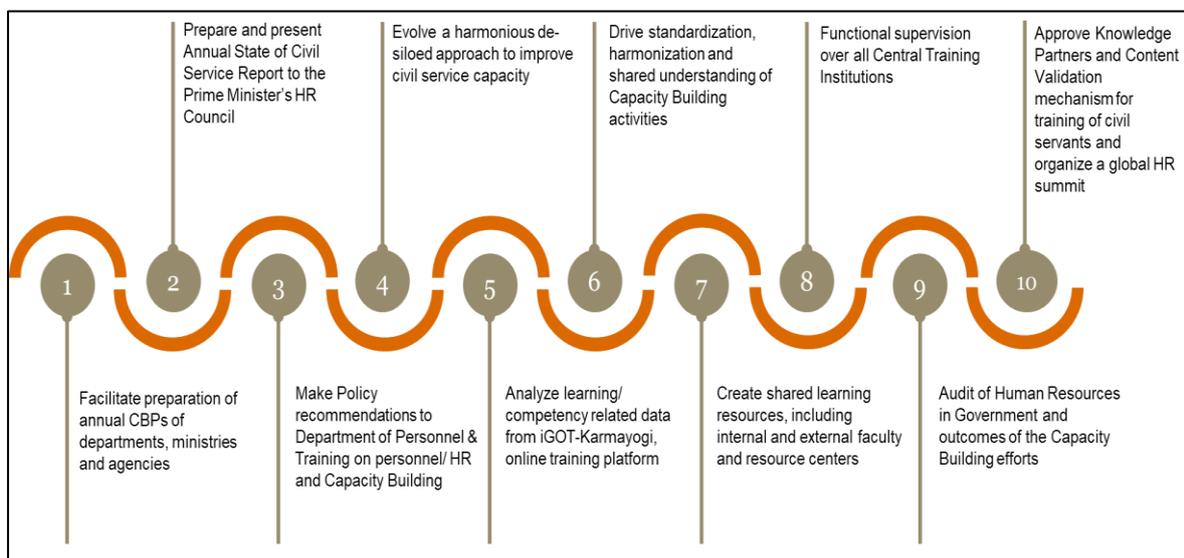

- Knowledge about the sector to create cadre of forward-looking administrators: For example, the demographic and epidemiological transition that India is going through and its likely impact on Indian healthcare; best practices in public health, novel methods of organising provision of healthcare related to provisioning / purchasing; healthcare financing; application of genomics, impact of upcoming technologies like AI / ML / Blockchain on healthcare in greater detail etc.
- Skills such as talent spotting and nurturing; interpretation of data and its use in decision making; how to critically evaluate the results of studies and use it to guide policy making; how to evolve consensus between medical experts and administrators; how to commission a pilot for an intervention and how to evaluate its results; how to develop long term health plans; how to evaluate the gender aspects of health programmes etc.
- Attitudes such as respect towards professional expertise; acceptance towards decentralised decision-making, taking cognizance of the civil society; acceptance of differing needs of the marginalised and divergent populations; openness to consider alternate views; willingness to rectify decisions in light of fresh evidence etc.

## Annexure 1: About Mission Karmayogi

Mission Karmayogi 2 was launched by the Union Cabinet in September 2021. It is a National Programme for Civil Services Capacity Building (NPCSCB), which aims to prepare Indian civil servants for the future by making them more creative, proactive, professional, energetic, transparent and technology enabled. The focus of NPCSCB is on promoting ease of living and ease of doing business, by considerably enhancing the citizen-government interface. The NPCSCB has laid the foundation for capacity building for future generations of the civil servants with key philosophy “to create an ecosystem of competency driven training and human resource management by transitioning from a 'rules-based' system to the 'roles-based' system”.

The NITI Aayog has also highlighted the need for reforms in training of personnel in its report “India@75”. Additionally, the COVID 19 pandemic has underlined the need for the civil servants to be agile, capable of partnering with diverse stakeholders and to be up to date with new competencies.

The framework for implementation and monitoring of the Program would involve the Prime Minister’s Public Human Resource Council (PMHRC) which is the apex body for the Program. Under the apex body, there will be a Cabinet Secretariat Coordination Unit (CSCU) that will monitor the implementation of NPCSCB, align stakeholders and provide mechanism for overseeing Capacity Building Plans (CBPs). Capacity Building Commission (CBC) has been set up for functional supervision of civil services training institutions and would facilitate in preparation of the annual CBPs. A Special Purpose Vehicle (SPV) has been set up for operating the digital assets created for NPCSCB on behalf of the Government of India (GOI).

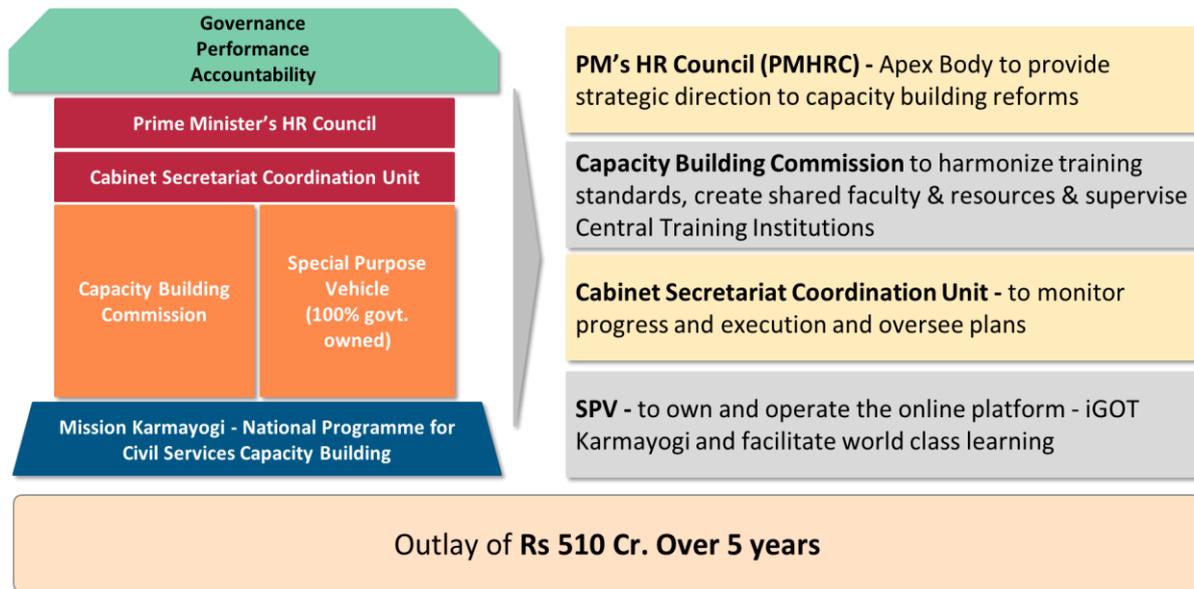

*Details of Mission Karmayogi*

The NPCSCB has six key pillars, namely:

- (1) Policy Framework
- (2) Institutional Framework

- (3) Competency Framework
- (4) Digital Learning Framework
- (5) Electronic Human Resource Management
- (6) Monitoring and Evaluation Framework

To oversee the planning and implementation of the NPCSCB, the Capacity Building Commission (CBC) was constituted in April of 2021. The Commission plays a key role at helm of Mission Karmayogi and its interventions are designed with three lenses: First, alignment of department's goals with national priorities; Second, Citizen centric service delivery, and third, enhancing capacity of civil servants on emerging technologies. The Commission is mandated to perform the following functions:

*Mandate of CBC*

CBC is currently conceptualizing and developing ACBP for pilot Ministries including - Ministry of Civil Aviation (MoCA), Ministry of Food Processing Industries (MoFPI), Ministry of Defence (MoD), Ministry of Social Justice and Empowerment (MOSJ&E) and Department of Expenditure (DOE). As the first step, CBC has been interacting and working along with these Ministries to chart out their goals, identify their competency requirement and preparation of their CBP.

This report provides a broad overview of the vision and the goals of MoHFW. It summarizes the competency requirements of the various divisions of the Ministry, and highlights some of the interventions that can be marshalled in short and medium term.

## Annexure 2: Overview of the Ministry of Health and Family Welfare

### 1. Vision of the Ministry

Attainment of highest possible level of health and well-being for all (SDG 3), through preventive and promotive health care and universal access to good quality health services without anyone having to face financial hardship as a consequence.

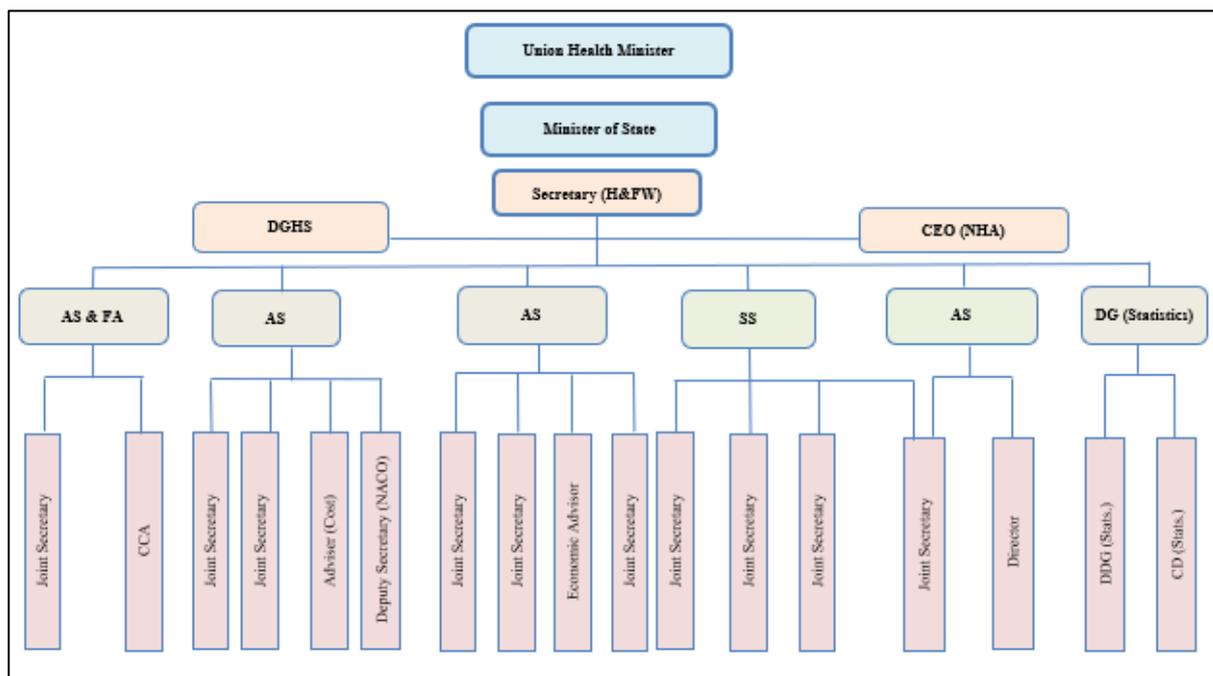

### 2. Mission of the Ministry

- To ensure availability of quality healthcare on equitable, accessible, and affordable basis across regions and communities with special focus on under-served population and marginalized groups.
- To establish comprehensive primary healthcare delivery system and well-functioning linkages with secondary and tertiary care health delivery system
- To develop the training capacity for providing human resources for health (medical, paramedical, and managerial) with adequate skill mix at all levels.
- To regulate health service delivery and promote rational use of pharmaceuticals in the country.

### 3. Objectives of the Ministry

- To improve health status of the people through concerted action
- To expand preventive, promotive, curative palliative and rehabilitative services provided through public health sector with focus on quality.
- To progressively achieve Universal Health Coverage

### 4. Organisation Structure

The organogram of the MoHFW as on 31st March 2023

## 5. Organisation Strength

The strength of employees of the Ministry of Health and Family Welfare, as of 31.3.2023, is provided below,

Timely settlement of all the claims of ITDC Hotels, Air Travel Bills etc.</p> <p>17. To make arrangements at the airport for Immigration/ Custom/Security clearance for Ministers/Secretaries/Additional Secretaries and visiting dignitaries during their arrival and departure at IGI Airport.</p>

## Annexure 3: Training Interventions support by other private institutions.

### 1. Training of elected health functionaries at sub-district level

PATH's intervention design shall encourage three types of learning styles - visual, auditory and kinaesthetic - to ensure that knowledge and skills of people with different learning abilities are effectively strengthened. Our approach will involve pedagogic, cascade style of transfer of learning, along with one-on-one learning interface between learner and mentor as well as self-learning methods. To get a better understanding about the needs on the field, PATH will work closely with local self-government institutions, like Zila Parishads and Panchayati Raj Institutions to assess the awareness levels of government schemes, policies and identify key gaps. We will form a knowledge network by collaborating with academic institutions in the target geography who could provide support (Master's students from Rural Development and Social Work) in conducting training. PATH can support in developing the necessary health training modules and providing on-site learning. Depending upon the need, PATH can also develop audio visual content that those trainees could use to get an understanding of various health schemes and health systems functioning.

#	Scope	Suggested Details
1.	Target Group	Elected health functionaries at sub-district level. Field level staff including CHOs, and ANMs.
2.	Training Duration	The training needs assessment, development of training modules and conducting of training is estimated to take about 6 months.
3.	Orientation and training modules/topics	<ul style="list-style-type: none"> <li>• Overview of healthcare systems, governance, and their functioning</li> <li>• State specific health programs and schemes</li> <li>• Knowledge sessions on newly introduced health programs and policies</li> <li>• Empowering health functionaries to do systemic gap assessment, adopting systems approach to health</li> </ul>
4.	Training providers	Academic institutions/ local partners
5.	Medium of training	English, Hindi and Marathi (depending upon the target audience)
6.	Mode of training	<p>Training will be conducted in a hybrid mode.</p> <ul style="list-style-type: none"> <li>• Depending on the target group identified, training will be conducted via classroom sessions, and on-site/practical training at hospitals/ health facility will be done basis the deployment of the staff at field.</li> <li>• In addition to classroom and practical learning (which will be pedagogic in nature), mentoring (One-on-one, or one-to-few) and self-learning (e-learning – audio visual content) will be explored. PATH will also orient the staff on Government of India's learning platform called iGOT, that has content on self-learning on a variety of topics.</li> <li>• Certifications for training session could be provided by the knowledge and implementation partners.</li> </ul>

7.	Implementation partner	PATH along with another implementation partner.
----	------------------------	---

## 2. Capacity Building in 4 areas in health sector (as per 15th Finance Commission recommendations), Telemedicine and other aspects of health

Transform Rural India Foundation (TRIF) organises training for the following:

1. Building facility/facility improvement
2. Block Public Health Management Unit
3. Diagnostics
4. Health & Awareness Centres

TRIF also can organise workshops on 'Telemedicine' for Community Health Officers (CHOs) and Medical Officers (MOs).

TRIF also organises training for Panchayati Raj Institutes (PRIs) and ASHA workers on various aspects of health.

## 3. AI-Readiness Workshop for Health Officials

Wadhvani AI can organise a 5-session workshop on AI-Readiness in the field of health as part of an exposure to emerging technologies at MoHFW.

### **Session 1: AI Core Concepts**

Breaking down the fundamentals of artificial intelligence, machine learning, data, and models. The session also covers the introduction to the machine learning pipeline and the role of an AI engineer in building the solution.

### **Session 2: Applications of AI**

A view of AI solutions developed by Wadhvani AI across domains such as tuberculosis, agriculture, and maternal & child health.

### **Session 3: Data Readiness for AI**

What constitutes good data for AI solutions? This session looks at the types of data used for building AI solutions, the importance of streamlining the data collection process, and a checklist for data sharing with external stakeholders.

### **Session 4: Measuring and Evaluation of AI**

The role of measurement and evaluation as part of the AI solution development; begins with defining the problem and scope of an AI solution. This session also looks at how to assess the efficacy and effectiveness of AI solutions.

### **Session 5: AI Deep Dive**

A ground-level view of what goes into creating AI models; data pre-processing, splits, annotation, meta-data, and feature engineering. This session also provides an understanding of the various stages beyond the creation of the model, from calibration to evaluation, pre-and-post deployment.

### **Session 6: Responsible AI**

The ethics and responsibility while operating with Artificial Intelligence, stakeholder engagement, algorithm fairness, data collection, and evaluation.

#### 4. Training offered by TRIF

As a part of the need-based training, TRIF has offered following courses to be carried out across the country. CBU may dovetail these during the implementation exercise.

#	Course name & specifications	Target officers	No. of officer	Proficiency level Basic (B) or Advanced (A)...	Online / Offline / Hybrid	Duration (no. of hrs./ days)	Training providers and remarks	Proposed training quarter (Q)
1.	Role of Sahiya (ASHA Workers) in community mobilization for NCD screening	Sahiya (ASHA Workers)	7000	B	Online	4 hours	Professionals in community health and mobilization and State Resource Persons for ASHA training	Q2
2.	Tele-consultation by eSanjeevani portal : Methodology and use of the portal	Doctors and Qualified Nurses	3000	B	Online	4 hours	Professionals	Q2
3.	Community Compact (Role of PRIs-SHG-FLWs) for improving Health outcomes	PRI members, Cluster Level Federation (CLF) leaders and health officials	400	B	Offline	5 Hours	Experts in community health	Q2
4.	Preparation of Village Health Plan and integration with Gram Panchayat Development Plan	Elected representatives of Panchayati Raj Institutions	600	B	Offline/ Online	6 hrs	Professionals with experience in community health	Q3
5.	Strengthening Local Governance for Public Health	Elected representatives of Panchayati Raj Institutions (Zilla and Block Panchayat)	500		Offline	4 hrs	Professionals with experience in community health	Q 3
6	Design thinking for Public Health Leadership	District Level Officials	50		Offline	10 hrs/ 2 Days	Bharat Design Lab : A joint initiative of TRI and D-BLAB at Harvard	Q3

## Annexure 4: Analysis of Division-wise training needs requested

### 1. Summary of training needs requested across Divisions

#### 1.1. Domain training sought

The most common Domain competencies across division that were requested by respondents are provided below. Alongside is a list of training partners that can conduct these training and source to compile the material, as identified by the divisions:

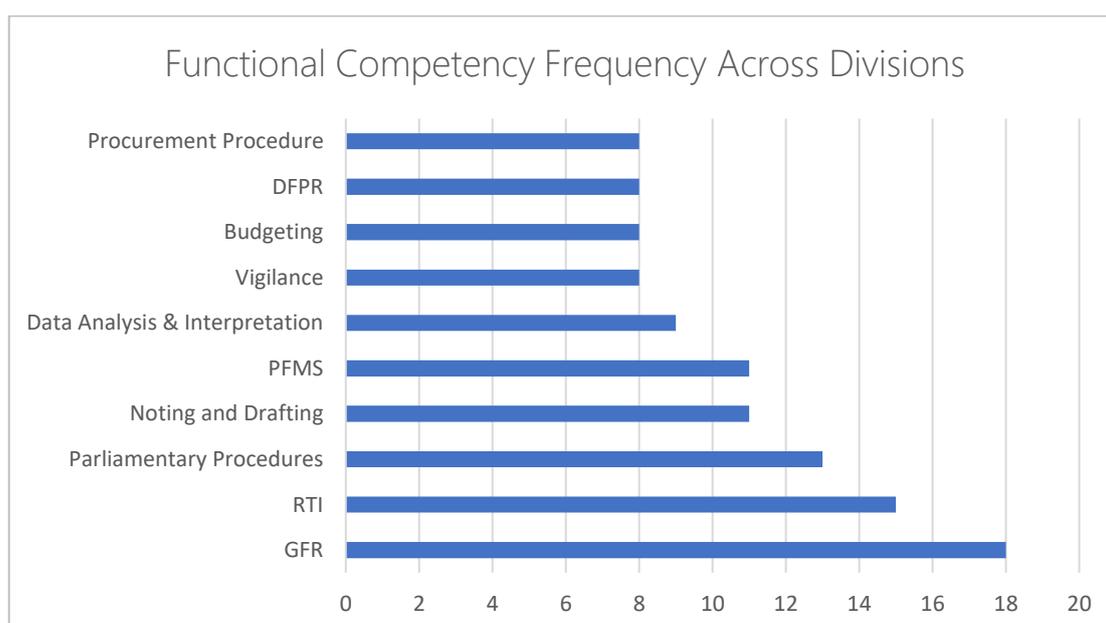

#	Domain Areas	Training Partner(s)
1	Global best practices in H & FW	NIHFW, NHSRC, WHO IIM-C, ISB-Hyderabad
2	Global best practices in Health IT	IIM-A/B, WB, WHO, MoHFW -IT Division. – AS (Luv), PwC/KPMG/Deloitte/BCG
3	CSS architecture of NHM, PM ABHIM	NIHFW, NHSRC can be an iGOT course
4	Scheme related training (PMJAY, NHM etc)	NIHFW (Content from NHA -National Health Agency)
5	NHM Dashboard	NHRSC
6	Medical Education Rules & Legislations (NMC Act, INC, Act, PCI Act etc.)	NIHFW (content from Medical Edu division. plus, content INC, NMC, PCI, DCI)
7	Regulations (FSSAI, regulatory bodies etc.)	INC, NMC, DCI, PCI, NCAHP, FSSAI and other affiliated regulators
8	Orgs (Central Drugs Standard Control Organisation (CDSCO), National Institute of Biologicals (NIB), Indian Pharmacopoeia Commission (IPC))	Induction/Orientation
9	National List of Essential Medicines	CDSCO
10	Large Scale Survey Design, Roll-out, Analysis, Evaluation, Official Statistical System	DMEO, ISI – Delhi/Kolkata
11	Company Act & Corporate Governance (reg. PSU (HPE section) – reading balance sheet & accounting, bonus share, dividends, board agenda, disinvestment)	Indian Corporate Law Services Academy, NIFM, NIPFP

#### 1.2. Functional training sought

The most common Functional Competencies division that were requested by respondents are provided below. Alongside is a list of training partners that can conduct these training and source to compile the material:

#	Functional Areas	Training Partner(s)
1	GFR, DFPR, FR/SR	ISTM
2	Parliamentary Matters	ISTM
3	Legal matters/court cases (including legal drafting)	ISTM
4	Vigilance Matters, Disciplinary Proceedings	ISTM
5	e-Office, Ehrms	ISTM
6	Noting & drafting	ISTM
7	Basic IT, Data Analysis & Interpretation	ISTM
8	Portal – PFMS, GeM, eSamiksha, CPGRAMS	ISTM
9	Accounting & Budgeting	ISTM
10	RE/BE, SFC/EFC proposals	ISTM
11	CPPP and creation of BoQs	ISTM
12	Technical analysis of bids for goods and services	ISTM
13	e-Governance & ICT	ISTM
14	Grievance Redressal	ISTM

The chart below showcases top 10 competencies sought by respondents across divisions. Maximum respondents sought to refresh GFR related knowledge followed by updating skills on Right to information (RTI) matters, parliamentary procedures, noting and drafting and public financial management system (PFMS).

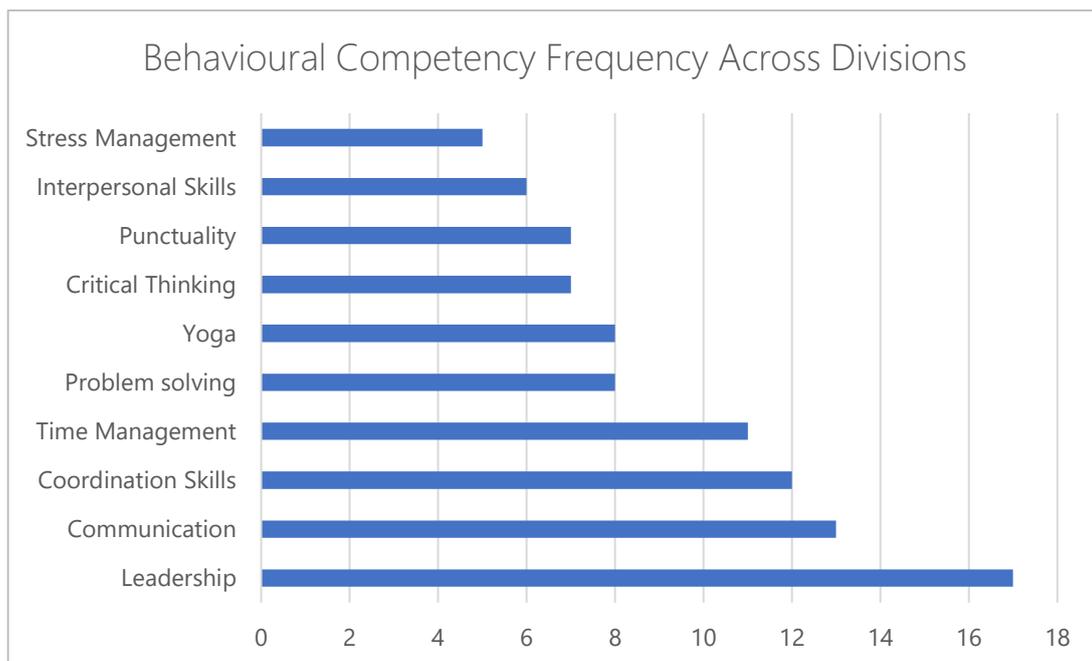

Source: Training needs survey, MoHFW

### 1.3. Behavioural training sought

The most common Behavioural Competencies division that were requested by respondents are provided below. Alongside is a list of training partners that can conduct these training and source to compile the material:

#	Behavioural Areas	Training Partner(s)
1	Time Management, Meeting Management	ISTM, IIPA, IIMs, ISB and other leading private institutions
2	Stress Management, Yoga	Art of Living, Isha foundation, others approved by DoPT or internal trainers directly sourced by MoHFW
3	Oral & Written Communication Skills	ISTM, IIPA, IIMs, ISB and IIMC,
4	Presentation Skills	Microsoft/IIMs/Leading private sector schools
5	Leadership & Team Building	IIMs/Leading private sector schools
6	Effective resource utilisation	IIMs/Leading private sector schools
7	Ethic and Values	IIMs/Leading private sector schools
8	Motivation & Morale building	IIMs/Leading private sector schools
9	Critical Thinking & Problem Solving	IIMs/Leading private sector schools
10	Conflict Resolution	IIMs/Leading private sector schools

The chart below showcases top 10 competencies sought by respondents across divisions. Maximum respondents sought to train on leadership aspects including communication and coordination skills. Well-being aspects covering stress management, conflict management, health management, times management combined was another well sought topic.

Source: Training needs survey, MoHFW

## 2. Division-wise training needs requested

This section deals with the respondents' data analysis across divisions. Data was provided vide filling up the structured questionnaire circulated within the Ministry across 24 divisions. Few sections provided only overall needs and has been accordingly captured in the analysis below. Source for all the analysis covered ahead is the training needs analysis exercise conducted in the Ministry. Given ahead are an enlistment of needs across the three competencies in various divisions to provide training needs and roles and responsibilities. Based on the same the training plan is to be culled out for year 1 and future years. Section or cells empty maybe read as no training quoted as required in the year 1. A reiteration of the exercise may be required owing to changes in work allocation, transfers, policy changes, eco system changes etc. The same may be taken up by the Capacity Building Unit (CBU), proposed under the administration department. It is to be further noted that CBU in tandem with the training providers, who will take ownership of preparation of training calendar based on priority of the divisions, conduct of training, content development and undertaking required changes to the training needs, ongoing or futuristic.

The Legend to read the data set as applicable to proficiency levels is as follows:

**A: Advanced course**

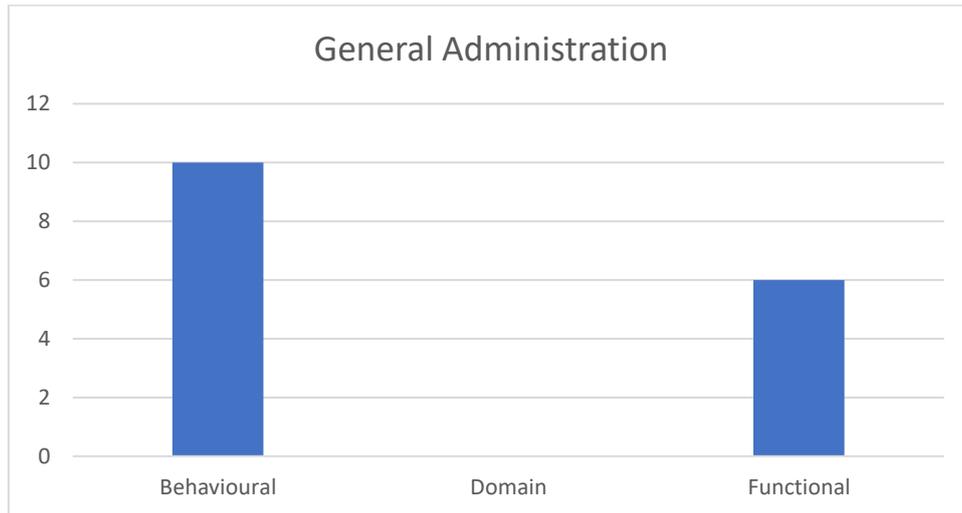

**B: Basic course**

**C: Induction course material, captured through the 'Know your Ministry' module**
