GSR	Ground Surface Reservoir
HR	Human Resource
IT	Information Technology
JNNURM	Jawaharlal Nehru National Urban Renewal Mission
MC	Municipal Commissioner
NPCSCB	National Programme for Civil Services Capacity Building
O&M	Operations and Maintenance
PMAY	Pradhan Mantri Awas Yojana
NMC	Nagpur Municipal Corporation
SBM	Swachh Bharat Mission
ULB	Urban Local Body

Introduction to Mission Karmayogi

1. Mission Karmayogi

1.1 About the Mission

The Government of India launched National Programme for Civil Services Capacity Building (NPCSCB)-‘Mission Karmayogi’ with the aim to transform the capacity and performance of government employees and bring about systemic reforms in the human resource management of the Indian government. The program, anchored by an apex body and headed by the Prime Minister, is designed to enhance the civil services to address changing needs and aspirations of the citizens.

With the changing times and advent of technology, the role of civil servants in India has become multi-faceted and complex with increasing demand for efficiency and transparency 24*7. They need to be well-equipped with the necessary skills, competencies, and mindset to effectively address the challenges and demands of modern governance and deliver public services that meet the needs of citizens in the digital age. However, the current competency building landscape has not been re-engineered to address this.

NPCSCB-Mission Karmayogi has been carefully designed to lay the foundations for capacity building for Civil Servants so that they remain entrenched in Indian Culture and sensibilities and remain connected, with their roots, while they learn from the best institutions and practices across the world ¹.The core guiding principles of the Programme are:

- 1. Transition from ‘rule-based’ to ‘role-based’ human resources management:** Traditionally, the general understanding of a job description within any level of Government – Union, State or local has implied an excellent understanding of rules or laid down procedures without necessarily attributing results to the application thereof. Lessons learnt from international bureaucracies and competency frameworks indicate the necessity of defining a ‘role’ for a government official. A role usually comprises of functional, domain and behavioural competencies – coupled with a set of expected result areas, both for the individual as well as the office or organisation as a whole. Mission Karmayogi proposes to bridge this gap through the capacity building process.
- 2. An ecosystem of shared learning landscape:** Government offices have traditionally been structured to work with a singular domain-based focus, risking the creation of ‘silos’. In such a situation, the staff is often not able to catch up or relate to matters that they have conventionally not been able to relate to their functional domain. As India’s understanding of developmental issues improves with understanding interrelationships between domains, the ability to relate as well as respond to such concerns takes considerable priority in terms of skills needed for job descriptions. A shared learning platform, which

¹ Press Information Bureau

- includes shared learning materials, institutions, training materials, training infrastructure, allows for the staff to view issues from multiple perspectives, essentially ‘breaking down’ the silo. Mission Karmayogi, through the iGOT, proposes to provide such a platform.
3. **Citizen Centricity at the Core:** Acknowledging that the Government keeps the citizen at the center of its operations, Mission Karmayogi proposes to develop behavioral competencies to understand and appreciate citizens’ concerns, such as the ability to listen, empathize and think out of the box solutions.
 4. **Continuous and lifelong learning opportunities:** The iGOT platform developed under Mission Karmayogi proposes to ensure that Government officials can continue to learn new skills and competencies throughout their careers and beyond.
 5. **Shift to the 70-20-10 model:** Traditionally, Government staff learn ‘on-the-job’ through a mix of experiential learning, i.e., learning by doing on the job; relational learning – from peers and superiors and structured or informational learning, which comprises of formal training. Mission Karmayogi proposes to rationalise this mix to 70:20:10 respectively, utilising appropriate inputs from domain, functional and behavioural training.
 6. **Link goal setting, planning and achievements:** Mission Karmayogi proposes to internalise the established system of linking organisational goals to individual staff performance areas and goal settings, as is followed in most organisations across the world, to ensure achievements of both.
 7. **Establish unbiased systems of evaluation:** Also based on learning from feedback systems used within Indian and foreign Government as well as intergovernmental systems, Mission Karmayogi proposes to foster a more equitable system of employee performance grading as well as ability to rate work environments at large.
 8. **Shift the mindset of public officials toward capacity building:** Mission Karmayogi proposes to adopt a holistic learning approach to develop a culture of learning among public officials from a mere compliance driven approach.

Central to the mission is the recognition that a suitable government workforce requires a competency driven capacity building approach which is essential to discharge their roles efficiently and effectively. The mission aims to achieve this through developing a new Competency Framework for Civil Services that will be totally indigenous to India and which will ensure that civil servants will be able to provide efficient service delivery of the highest quality standards.

1.2 Capacity Building Commission

The NPCSCB envisioned to establish a Capacity Building Commission, with a view to ensure a uniform approach in managing and regulating the capacity building ecosystem on collaborative and co-sharing basis. Accordingly, The Capacity Building Commission was constituted through the Gazette of India on 1 April 2021 to drive standardization and harmonization of capacity building efforts across the Indian civil services landscape. The Commission’s mission is to create optimal learning opportunities for each public functionary with the objective to build an agile and future-ready civil service.

The Commission is mandated to perform the following key functions-

- Coordinate with Departments, Organizations, and Agencies of the Government of India for evolving a harmonious de-siloed approach to improve capacity and build shared resources.
- Facilitate preparation of Annual Capacity Building Plans of participating Organizations and submit the collated Plans for approval to the Prime Minister's Public Human Resource Council (PMHRC). The Commission will thereafter monitor and report the periodical progress of implementation to the Government.
- Prepare the Annual human resources report on the health of Civil Services along with target achievement and make it public with the approval of the DoPT.
- Undertake Audit of Human Resources available in Government and assess outcomes of the Capacity Building efforts and present an evaluation of the same for approval and necessary guidance to the Cabinet Secretariat Coordination Unit.
- Make recommendations on standardization of training and capacity building, pedagogy and methodology including coordination with Government Training Institutions to carry out research on pedagogy, competency framework, competency gap assessment, etc.
- Exercise functional supervision over institutions engaged in the imparting of training to all Civil Servants, for purposes of adherence to and achievements of annual capacity building plans; and the creation of an ecosystem of shared learning resources including shared internal and external faculty.
- Approve Knowledge Partners for the programme.

While the Commission discharges its functions for the Union Government, it also has a mandate to utilize its knowledge in supporting Ministries in developing and devising capacity building initiatives that can be taken up by States and local Governments through mutual understanding and agreement. It is in furtherance to this mandate; the Commission proposes to work with select Municipal Corporations (Urban Local Bodies) from different States in the development of Annual Capacity Building Plans (ACBP). These ACBPs will be a tool for the select Municipal Corporations to develop a comprehensive capacity development ecosystem which will eventually lead to improved local Governance & service delivery.

Approach & Methodology for Preparation of Annual Capacity Building Plan (ACBP)

2. Approach and Methodology

2.1 Need for Capacity Building of Urban Local Bodies

India is one of the fastest-growing economies in the world today and much of the economic developments occurred in the last few decades have been credited to the rapid urbanization experienced by Indian cities. Cities in India occupy a central position for propelling India's economic growth, and this is highlighted by the fact that cities are now considered as 'engines of growth' and have massive 60% contribution to the Nation's GDP.

Demographically, India is swiftly moving forward for becoming half urban in a couple of decades. The number of inhabitants in Indian cities is estimated to have increased almost fourfold between 1970 and 2018, from 109 million to 460 million. India is already a second-largest urban community in the world, and it is expected to add another 416 million people to its cities by 2050.

As India transitions from being a largely rural to an urban society, the focus needs to be on harnessing the economic potential of all cities, large and small. However, despite huge investment, our cities still face many efficiency and sustainability related challenges. None of our cities feature among the top 50 cities in many global rankings. Rapid urbanization has put tremendous pressure on the existing infrastructure, services, and resources. With the increasing demand and with the total number of urban settlements rising to 7933, the Urban Local Bodies (ULBs) are facing a serious challenge of providing minimum basic services such as water supply, housing, sanitation, and solid waste management.

To ensure that Indian cities deliver on the promise that urbanization holds for the country and these engines of growth drive the process of development sustainably, there is need for serious and massive interventions to empower and strengthen the ULBs.

2.2 Why Annual Capacity Building Plans for the ULBs?

Owing to realisation that ULBs need to augment their capacities, a range of capacity building measures were undertaken in the country. These capacity building measures received significant boost in terms of scale and scope with the launch of JNNURM in 2005. Under JNNURM, many reforms were prioritised however, many cities, either were unable implement these reforms or unable to leverage available funds because of lack of capacity and technical expertise (Planning Commission, 2011).

Experience, over the course of implementation of other Centrally Sponsored Schemes such as AMRUT, PMAY, Swachh Bharat, Smart Cities etc, appear to indicate increase in a static capacity to take up projects and augment service delivery. In all fairness, each of these programmes attempted to augment capacities of municipal bodies through the course of availability of capital, development of infrastructure and scheme specific reforms.

However, to address the challenges confronting Indian cities, there is an urgent need to focus on the capacity building of municipal bodies with a bottom-up approach where focus should be on improving the institutional, organizational and individual competencies required to effectively deliver roles and responsibility of each designation, function and department, aligned to overall development vision or objectives of the city.

Drafting of Annual Capacity Building Plan (ACBP) for the select ULBs is an attempt to address the critical task of capacity building of ULBs. At the core of preparation of an ACBP is a ‘bottom up’ approach as it focuses on assessment of training needs of the ULBs. In addition to this, ACBP is an attempt to create explicit training demands, provide credible supply side institutions (which can provide courses on specialised knowledge as well as experiential learning), build partnerships among peer institutions and create a culture of undertaking regular trainings/courses to augment capacities.

ACBP, as the name suggests, is an annual activity which will be implemented throughout the year and will be driven by the ULB for its employees. ACBP document is dynamic in nature and subject to changes/modification/upgradation based on ever changing needs of managing urbanization vis-a-vis required competencies of the ULB to effectively address the same. The ACBP is expected to ensure that the capacity augmentation is a sustainable and continuous process and does not depend upon implementation of any schemes/reforms.

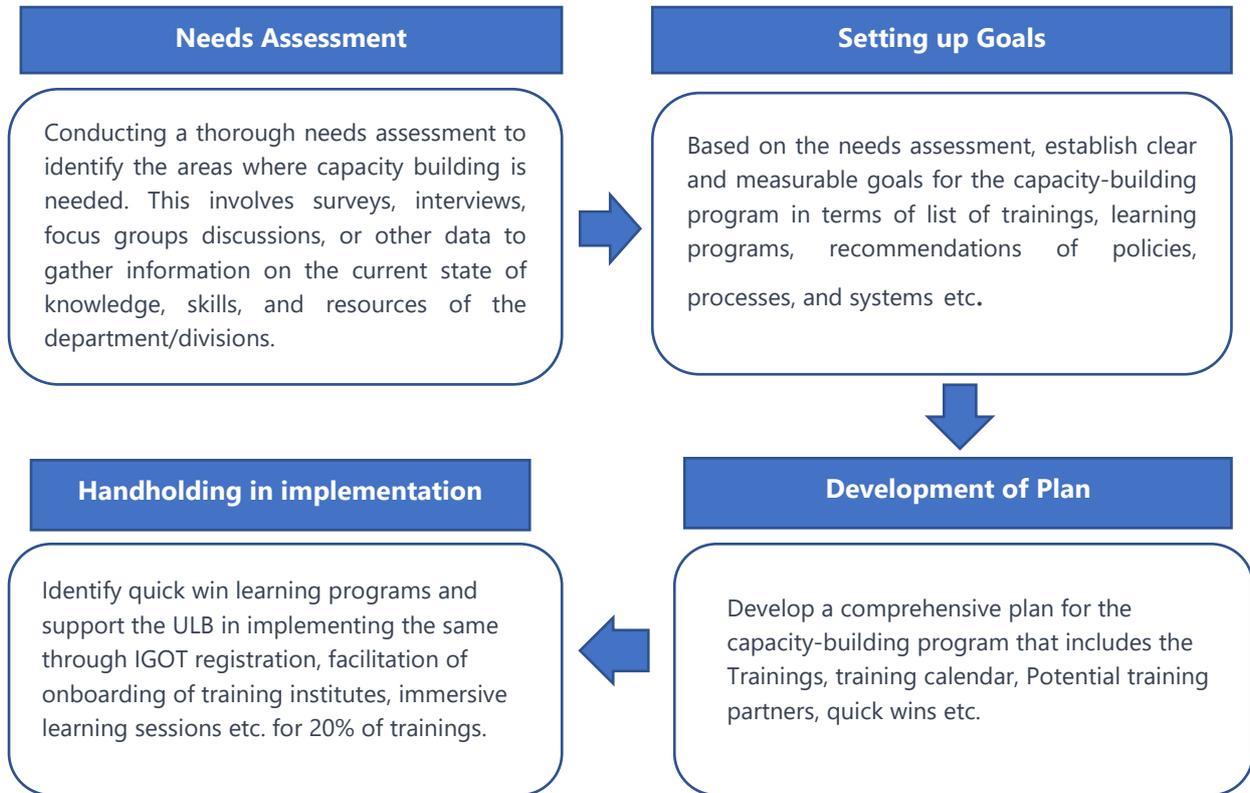

2.3 Our Approach

The capacity of the local urban bodies in India varies widely across States and cities. Given the lack of overall capacity, the ULBs, sometimes, are not able to even articulate their demand for training. Under such circumstances, earlier implemented capacity building programs with a ‘Top-Down Approach’ could not yield desired outcomes. In addition to this, as these initiatives were attached with particular scheme or program, they were run as a onetime activity, lacked systematic approach and ended up running capacity building programs in silos. The process of urbanisation is dynamic and as cities are growing faster, their issues and challenges are becoming more complex. In such circumstances, any capacity building program is prone to quick depletion unless it is being launched as an on-going process with constant updation (Jha, 2018).

Drawing on the insights from the distinctive features of Indian cities and learnings gained from the legacy capacity building initiatives, this Capacity Building Commission envisions establishment of a municipal capacity building management system wherein emphasis is being laid on Demand Driven approach instead of Top-down supply of trainings.

Accordingly, CBC aims at preparation of ACBPs for select ULBs. These select ULBs are governing high performing cities who have already attained a mature level of governance and will be creating a demonstrative effect i.e., create a roadmap for other cities to follow. They will act as beacons of progress for other ULBs in the country.

Our Approach for Preparation of Annual Capacity Building Plan for Urban Local Bodies:

2.4 Framework of capacity Building of ULB

Capacity building of Urban Local Bodies

Organisational

It encompasses the process of enhancing an organization's ability to effectively achieve its mission and goals by improving its internal systems, processes, and capacities.

Organizational capacity building aims at-

- Strengthening of leadership
- Nurturing of human resources
- Prudent financial management
- Efficient program management.

Action points

Individual

It involves the process of enhancing the knowledge, skills, abilities, and attitudes of an individual to improve their performance, effectiveness, and personal development.

Skillsets required to enhance individual capacity are categorised into three categories-

- Functional skills
- Behavioural skills
- Domain specific skills

Training Intervention

Sessions / workshops to be conducted by experts on specified topic.

Non – Training Interventions

Cross learning / immersive learning through interactions / site visits

Annual Capacity Building Plan

Institutional

It refers to improving the organization's governance structures, systems, policies, and procedures to enhance its efficiency, effectiveness, and sustainability.

For capacity building, it focuses on broader aspects such as-

- Governance structure
- Policy formulation and implementation
- Stakeholder engagement mechanisms
- Culture of transparency and accountability

Recommendations

2.5 Our Methodology

As – is Analysis

- Understanding the vision, mission, and goals of the Municipal Corporation, along with work allocation as per different divisions.
- Understanding the roles and responsibilities across all levels (spanning from Sr. Engineer, Chief Accountant to Junior Clerk) for their respective divisions/sections.
- Understanding of day-to-day operations and competencies required to do them efficiently.

OUTCOME: Capacity Need Analysis matrix (division wise / hierarchy wise)

Gap Assessment

- Gap assessment was conducted via one-to-one surveys as well as focussed group discussion.
- A pre-set of questionnaire was used to map competencies across three categories- domain specific, function related and behavioural (soft skills)

OUTCOME: Competency Gap = Capacity Need analysis – Competencies possessed

Proposed Interventions

- Training interventions (Induction, Immersion, Exposure, Behavioural), Upskilling, Domain and Technological interventions were included in the capacity building plan.
- Non-training interventions (Manpower improvement, Team-building exercises, Role-skill required efficiency match, etc.) were also a part of the plan to improve the ULB's capacity.

OUTCOME: Training and non – training interventions

Action points for Capacity Building

- A training universe is created based on individual training need assessment. It has categorised trainings into 6 broader themes along with their priority levels-critical, high and medium.
- An annual training calendar is prepared to monitor the process of capacity building with defined milestones.

OUTCOME: Annual Capacity Building Plan

**Nagpur
Municipal Corporation**

3. Nagpur City

3.1 Profile

Nagpur, popularly known as the ‘Orange City’, is one of the fastest growing metropolises and the third largest city after Mumbai and Pune in Maharashtra. The city is the geographical ‘center’ of India as country’s ‘Zero-Milestone’ is located here.

The city is bestowed with rich history and since ages it has been an important place from cultural and political perspectives. The city is well connected with the air, road and rail mode of transport with all the major cities of the country.

The city is of significance and many aspects show that it is growing in terms of business, education, industry, manufacturing and research. It has a diverse industrial base encompassing various sectors such as manufacturing, textiles, engineering, automotive, chemicals, pharmaceuticals, food processing, and more. Nagpur has established industrial zones and parks to promote industrial growth and provide a conducive environment for businesses. The Butibori Industrial Area, located on the outskirts of the city, is one of the largest industrial estates in Asia and houses numerous industries. The MIHAN project is a flagship initiative aimed at developing an integrated aerospace and logistics hub in the city.

In addition to this, Nagpur also acts as a hub of education and health services not just for the population in the nearby districts but also for the adjoining states such as Madhya Pradesh, Chhattisgarh and Telangana.

Nagpur measures well on various liveability indices. It has one of the lowest income inequalities among various cities in the country and it is an attractive destination for both residents and businesses alike.

3.2 Civic Administration

The Nagpur Municipal Corporation oversees the local governance of the city. The Corporation was established in 1951 under the Nagpur Corporation Act, 1948 (CNC Act). The main responsibility of the NMC is to provide essential urban services to the citizens of Nagpur. These services include water supply, sewage management, waste disposal, improvement of slum areas, planning land use, building and maintaining internal roads, street lighting, maintaining parks and gardens, and providing primary healthcare and education facilities. NMC coordinates with various other government organizations like NIT, MHADA, MSRTC, the Traffic Police, MPCB, etc., for delivering these basic urban services.

The city is divided into ten zones for administrative purposes. The Nagpur Municipal Corporation (NMC) has two wings: the administrative wing, which comprises of Commissioner, Additional Municipal Commissioner, Deputy Municipal Commissioner, and Municipal Secretary, and the deliberative wing, which comprises of Mayor, Deputy Mayor,

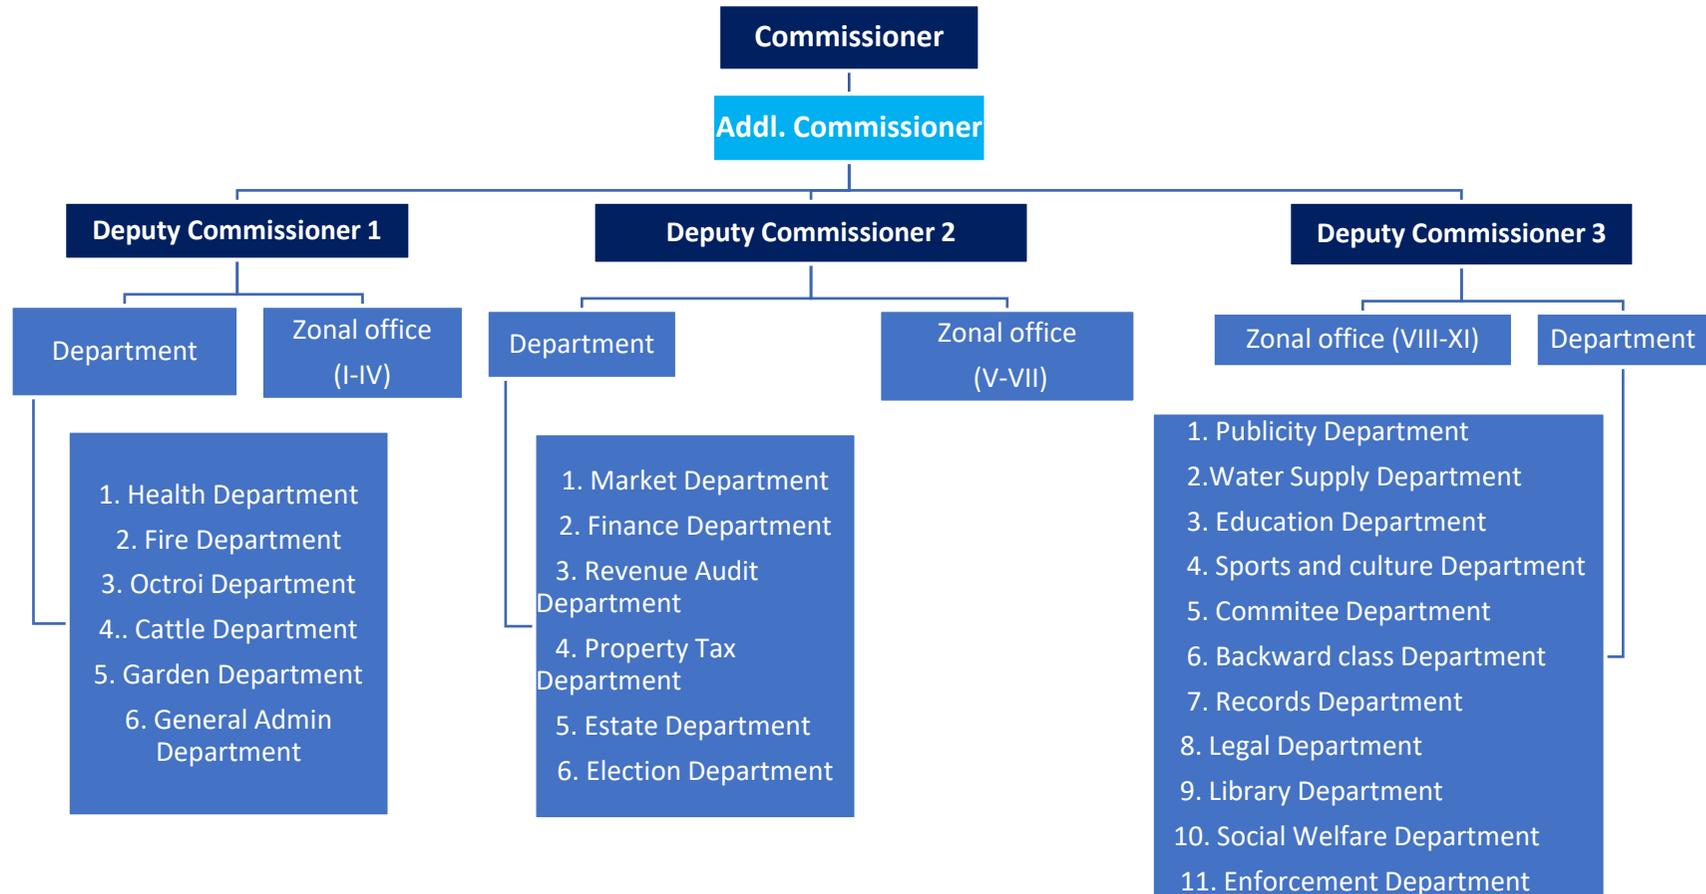

Chairman of the Standing Committee, Ruling Party Leader, Opposition Party Leader, Elected Members, and Nominated Members.² The two wings together are accountable for the proper functioning of the city and ensuring service delivery to the residents of the city.

Key Achievements/ Features of Nagpur City

- Nagpur city ranked 8th in the state and 27th in the country in the Swachh Survekshan Survey conducted by the Ministry of Housing and Urban Affairs.
- Nagpur was felicitated nationally for its intent to scale up walking and cycling transformation and accelerate the progress of street design projects.
- Nagpur was selected as one of the 100 cities under the Smart City Mission Flagship program in 2015.
- The NMC has implemented various initiatives like Smart Roads, Smart Energy, Smart Water Management, and Smart Mobility to develop digitally advanced and sustainable infrastructure in the city.
- Nagpur's Jalyukt Shivar Abhiyan, a water groundwater conservation scheme to combat water scarcity in the region, has won several accolades.

(Source: Website of Nagpur Municipal Corporation)

3.4 Key Challenges Observed

1. Shortage of Workforce

In the wake of the changing economic environment and rapid urbanization, there has been increasing pressure on the NMC to improve service delivery. However, the NMC is suffering from severe shortage of qualified workforce. Currently, many vacant posts have been filled by giving additional charges to the existing employees. This has impacted over all capacity to perform and resulted into increasing instances of in-efficient service delivery, delays and unaddressed grievances.

2. Lack of Attention towards Defining Job Descriptions and Standard Operating Procedures

There are no process or documentation for accessing defined roles and responsibilities for most of the designations under different departments. In the absence of defined roles and responsibilities, it is difficult to understand the work priorities, effort requirements and accountability which leads to ineffective time management and resources utilization. Additionally, there are no established standard operating procedures for key processes and tasks for different functions and departments which leads to duplication of efforts, lengthy turnaround time and uneven distribution of workload. As the ULB is experiencing severe shortage of manpower, employees are burdened with additional responsibilities. In the absence of defined roles and responsibilities, SoPs, etc. identification of required competencies vis-à-vis roles and development of recruitment strategy becomes difficult. This also leads to assigning additional responsibility to a person who may not have the suitable domain expertise or work experience required to perform the assigned additional job and he/she ends up taking judgement call or no call at all in day-to-day operations. This either results into poor decision making or ineffective service delivery in the department.

3. Fragmented Approach towards Capacity Building

Capacity building initiatives are often fragmented, with multiple agencies and departments involved in different aspects driven under different schemes. One of the reasons is limited awareness and engagement among ULB officials and staff regarding the importance of capacity building due to excessive load of work and dynamic priorities. Lack of coordination and a cohesive approach led to duplication of efforts, inefficient resource utilization, and a fragmented impact on ULB capacity development. The domain of capacity building and related activities such as induction training, refresher courses, training of new technologies, Knowledge Tours, etc. are neither priority nor mainstreamed. This has resulted into inadequate knowledge base, poor resource use efficiency and reluctance in adoption of new technologies and process among the municipal staff.

4. Behavioural Training/Soft Skills is a Neglected Domain

The Municipal Corporation, being the third tier of governance, is closely associated with the citizens and engages with them on daily basis. In such scenario, while addressing issues of the citizens effective communication, leadership skills, conflict management techniques, etc. play a very crucial role. As municipal staff is not equipped with this skillset, many situations/incidents escalate to larger scale leading to wastage of manhours and resources of the ULB.

5. Inter-departmental Synergy needs to be Enhanced

The departments of ULBs work in silos instead of working in co-ordination with each other. This has caused administrative delays, repetition of work and inefficient service delivery for the citizens.

6. External Factors

The corporation operate in a dynamic environment influenced by external factors such as policy changes, political interference, frequent transfers, and resource constraints. These external factors impact the effective implementation of service delivery, daily operations, and capacity building initiatives, if any.

Key Observations & Analysis

4. Key Observations and Analysis

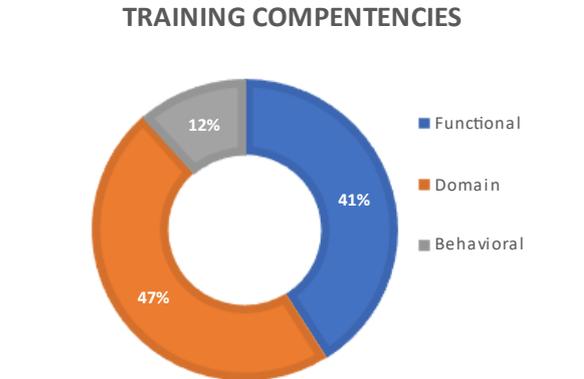

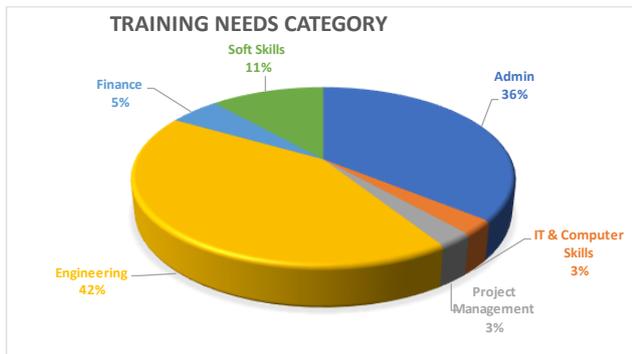

In the course of preparation of ACBP, As-Is study of the ULB was conducted. This included surveys, data collection, focus group discussions as well as interactions with the municipal staff belonging to various departments. During the study, a range of questions were asked to the staff members understand and gauge clarity on their job roles and responsibilities, major challenges they face as well as their opinions/perception about the performance of their own department.

In the next step, based on the job roles, competencies were recognised and accordingly training need analysis was carried out to identify whether there is any explicit demand for the training/capacity building, nature and type of trainings required, its level (beginner/advanced/refresher/etc.), etc. During the discussion, it was underscored that each and every department is understaffed and therefore overburdened with workload. In addition to it, many such HoDs, Deputy Heads were identified who were given additional charge of other department about which they have no knowledge base or domain expertise or any previous experience. This has resulted into inaction, delay and at times stress and frustration.

Although shortage of staff as well as qualified workforce hampers the capacity of the ULB severely, mere its availability in sufficient number doesn't ensure the augmentation in the capacities of the ULB to perform and deliver. Capacity building is a long term and continuous process and owing to complex urban systems and advancement in the technologies, regular updation in the knowledge base is the only alternative. Accordingly, further to As-Is study, mapping of job roles with required competencies and self-assessment w.r.t to the required competencies were carried out. Based on the requirement of competencies, a training need analysis was conducted. Salient features of this exercise are mentioned below-

4.1 Categorization of Training Needs and Competencies

We have performed surveys and assessments through 1 on 1 interviews, Focused Group Discussions and Department wise round table discussions. Their inputs and suggestions were recorded and analysed to identify key capacity augmentation areas. With respect to Individual Capacity Building, total 78 trainings have been identified which are grouped into six broad categories 1) Administration & Governance Module, 2) Technical & Engineering Module, 3) Project Management Module, 4) IT & Computer Skills Module, 5) Finance Module and 6) Soft/Behavioural Skills Module.

Based on Competencies, the identified training needs are further categorised into three categories. Functional Competency, Behavioural Competency and Domain Knowledge Competency.

From the identified universe of trainings for NMC, 41% of trainings came under functional competencies category and 47% are under Domain specific competencies while 12% are related to behavioural competencies as shown in the pie chart.

4.2 Categorization of Trainings based on Priorities / Objectives

Keeping in mind the 3 lenses of capacity building prescribed by CBC, trainings are further categorised as follows-

1) National priorities – This refers to the capacity needs identified for strengthening the skills, knowledge and competencies which are essential for effectively addressing infrastructure development and citizen service delivery objectives. This includes training needs include Construction, engineering, governance, economics and regulatory, environment etc. categories.

2) Emerging Technologies - This refers to the capacity needs identified for developing the necessary skills, knowledge, and competencies to effectively adopt, implement, and utilize new and innovative technologies. It involves equipping individuals with the capabilities required to harness the full potential of emerging technologies for various purposes such as improving productivity, enhancing services, solving complex problems, and driving innovation. This comprises trainings on programs/tools, latest equipment and machineries, new technology driven operational methods etc.

3) Citizen Centricity – This refers to the capacity needs identified for enhancing the ability of individuals to prioritize and focus on the needs/preferences/expectations of citizens and providing excellent customer service and delivering high-quality services that meet citizen expectations. This category includes trainings on behavioural skills, community engagement abilities, communication and collaboration etc.

Trainings supporting National Priorities	
1	Refresher Course on City of Nagpur Corporation Act, 1948 (CNC Act)
2	Refresher Course on Maharashtra Civil Services Rules- 1979
3	Refresher Course on Maharashtra Municipal Corporations Act, 1949
4	Refresher Course on Maharashtra Regional and Town Planning Act- 1966
5	Refresher course on Solid Waste Management Rules- 2016
6	Refresher Course on General Finance Rules and Procurement Policies
7	Refresher course - e-Procurement Systems and Process
8	Refresher course- GeM Portal
9	Training on Bid Process Management (Tendering)
10	Refresher course -RTI Act and Rules
11	Refresher Course on RERA Act and Rules
12	Refresher course on The Maharashtra Shops and Establishments (Regulation of Employment and Conditions of Service) Act, 2017
13	Training on Leading practices in Human Resource Management
14	Refresher course on Report-Writing, Note-Taking, Drafting mails
15	Refresher on Recruitment Rules
16	Refresher Course on Unified Development Control and Promotion Regulations (UDCPR) Building Rules for Maharashtra State
17	Refresher on Disaster Management Act, 2005
18	Refresher Course on Maharashtra Land Revenue Code, 1966
19	Refresher course on Environmental Protection Act, 1986
20	Refresher Course on Maharashtra Building and Other Construction Workers (Regulation of Employment and Conditions of Service) Rules, 2007
21	Refresher course - Central Goods and Services Tax Act, 2017
22	Refresher Course on Maharashtra Treasury Rules, 1968
23	Training on- Basic principles of Project management, PM Tools and Techniques
24	Training on Contract Management
25	Training on new equipment and Machinery in Civil Works
26	Training on Advance Construction Methodologies (Global Best Practices)
27	Training on Construction Quality Control Testing, Systems and Standards
28	Training on - Public Private Partnership models in Infrastructure Projects
29	Training on Preparation of DPR (Detailed Project Report)
30	Training on Handling special firefighting equipment
31	Training on Underwater Operations
32	Training on Fire safety
33	Training on Designing IEC Campaigns
34	Training on High Rise Building Rescue
35	Training on Dealing with Industrial Emergencies
36	Training on Dealing with Chemical Disasters
37	Training on CBRN (Chemical, Biological, Radiation, Nuclear) under Disaster Management

38	Training on Wireless communication
39	Training on Service Book Filling
40	Training on Health and Safety Measures
41	Training on Scuba Diving and underwater operations
42	Training on Legal Drafting
43	Training on vertical garden
44	Training on Principles of Public Bus Transport
45	Training on Leading practice in public bus transport
46	Training on Designing Sewerage and storm water drainage.
47	Training on Inventory Management
48	Training on lawn and landscape development
49	Training on Operations and Maintenance - Roads, Sewerage, Drainage
50	Refresher Course on Basics of Finance and Accounts
51	Training on Internal Audit
52	Training on transactions under PPP model (Accounts specific)
53	Training on ESCROW account opening and its operations.
54	Training on E- Document Management

Trainings for emerging technologies

1	Refresher course and Advanced Training -MS Office
2	Training on MS Excel (Dashboard, VLOOKUP, Formulas and Basic Analysis)
3	Training on Building Information Modelling (BIM)
4	Training on AutoCAD, STAAD Pro
5	Training on - SCADA Systems
6	Training on - Leading technologies in SWM
7	Training on Breathing Apparatus Training Gallery (simulations and models)
8	Refresher Course on Document Management System (MIS) & Office Procedure
9	Refresher Course on GIS
10	Training on HRMS Software

Trainings for Citizen Centricity

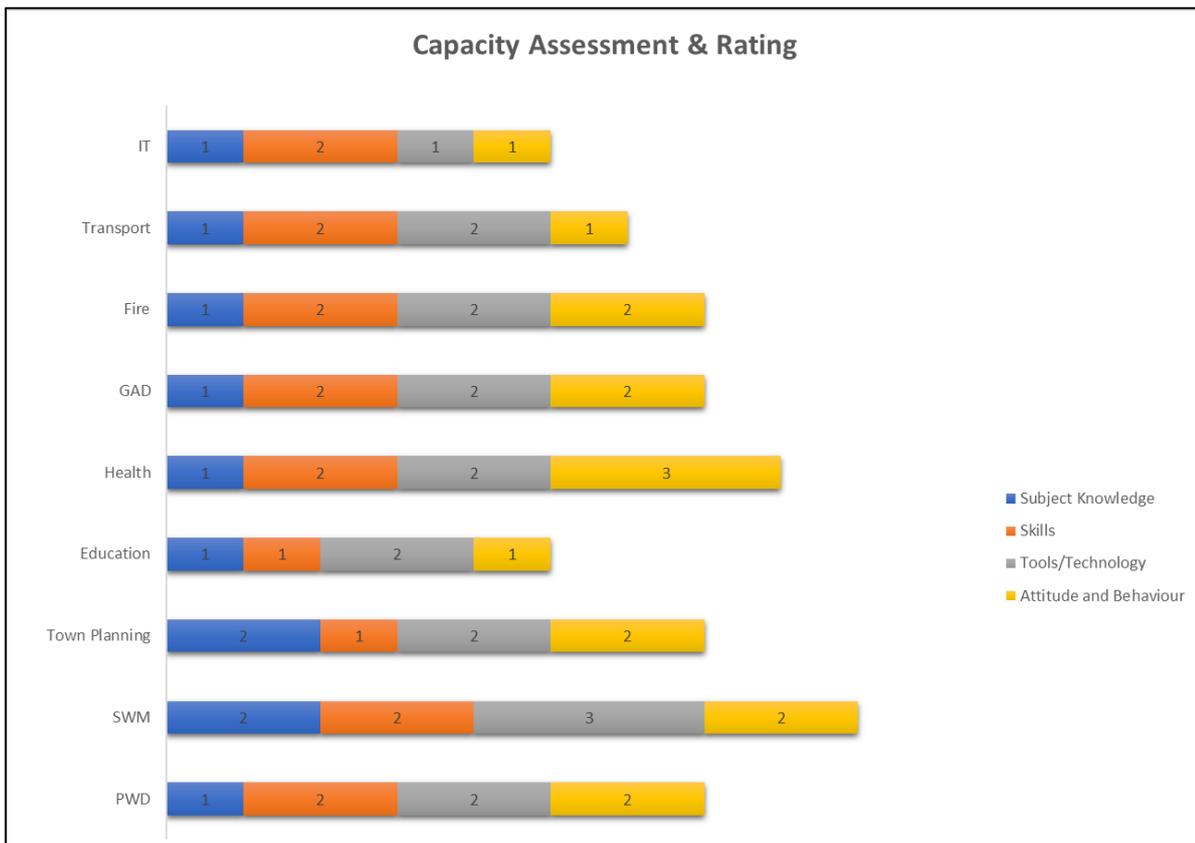

1	Training on Leadership Development
2	Training on Dealing with Public (Conflict Management/Anger Management/Difficult Conversations)
3	Training on Effective communication skills (Verbal and Non-Verbal)
4	Training on improving language proficiency
5	Training on stress Management
6	Training on Time Management
7	Training on Team Building
8	Training on New Approaches in Pedagogy
9	Course on Child Psychology

4.3 Self-Assessment of Existing Competencies

During the interviews with HoDs and focused group discussions, the participants were asked to rate the below 4 parameters with respect to existing competencies of their department.

- Subject Knowledge
- Skills
- Tools/Technology
- Attitude and Behaviour

And ratings were # Good – 1 # Satisfactory but needs attention – 2 and #Needs immediate attention – 3. In most of the cases the dominant rating was “Satisfactory but needs

Subject Knowledge - Skills - Tools/Technology- Attitude & behaviour

Good-1 # Satisfactory but needs attention - 2 # Needs immediate attention - 3

Individual Capacity Building

5. Individual Capacity Building

Individual capacity building refers to the process of developing an individual's skills, knowledge, and abilities to improve their overall performance and effectiveness. It involves a range of activities and approaches, including training, coaching, mentoring, and on-the-job learning. In addition to this, capacity building can also help individuals adapt to changing circumstances and remain resilient in the face of challenges.

Capacity building of municipal staff is essential to enhance the effectiveness of local government and ensure better service delivery to citizens. It involves providing training, support, and resources to enable municipal staff to perform their roles and responsibilities more efficiently and effectively. Capacity building includes technical training on specific skills, such as financial management, urban planning, or waste management, as well as soft skills like communication, teamwork, and leadership.

The following section focuses on the aspect of capacity building of individuals. It includes self-assessment activity to analyse various aspects of job profile and day to day work of the municipal staff followed by analysis of training needs. Based on the inputs received, a training universe has been created which categorises different training requirements into three major themes. Following this, for the key select trainings, curriculum has been designed. This curriculum acts as a guideline to the ULB while designing more trainings for its staff. To kick start training program, the section also provides an annual training calendar which includes department wise training needs along with an indicative schedule.

5.1 Self-Assessment of Capacity Needs

Self-assessment is a valuable tool for individuals in various aspects of work-life. Firstly, it allows individuals to take an honest and objective look at their performance, behaviour, and attitude. This enables them to identify areas that require improvement and develop strategies to enhance their skills and knowledge. Secondly, self-assessment can promote self-awareness, which is crucial for personal growth and development. Through self-reflection, individuals can gain insights into their own thoughts, feelings, and actions, and identify patterns of behaviour that may be hindering their progress. Thirdly, self-assessment can help individuals set realistic and achievable goals.

By examining their strengths and weaknesses, individuals can identify areas that need improvement and set specific and measurable goals to work towards. This can help them stay focused and motivated and track their progress over time.

During the survey, employees were asked to rate the current level and desired level of proficiency in identified skills on scale of 1 to 10. The objective was to understand the different levels of efficacies to design the right set of trainings covering beginner to

advance level of target efficiencies. The detailed self-assessment table is attached in the [Annexure-I](#).

5.2 Mapping of Roles, Responsibilities, Competencies, and Training Requirements

One of the important tasks, while identifying individual capacity building needs, was to understand various roles and responsibilities of different officials, identify key competencies and skillsets required to perform their job roles effectively and efficiently and finally, discover any training needs or capacity augmentation requirements. With respect to this, a mapping exercise was undertaken with the officials of the ULB which consisted of one-to-one interview as well as focussed group discussions. This mapping exercise has been a valuable tool which resulted into designation-based mapping of roles and responsibilities, competencies and skillset required to perform their duties and identification of training requirements/capacity building needs.

The finding of this activity has been incorporated in the Annual Capacity Building Calendar of the ULB. In addition to this, this mapping will be shared with potential training institute/s to design appropriate training programs for the different cadres of the Municipal Corporation.

Department wise detailed mapping is attached in [Annexure II](#).

5.3 Identified Training Universe

Based on mapping of functional vis-à-vis competencies requirement of each department of Nagpur Municipal Corporation and subsequent training needs assessment of individual roles, a total 78 topics/areas of trainings have been identified for different designations and levels. We have sub-categorized these training into 6 themes including 1) Administrative and Governance, 2) Technical and Engineering, 3) Project Management 4) IT and Computers 5) Finance and 6) Soft skills. However, the broad categories are still Functional, Domain and Behavioural.

	Topics, Themes, Areas identified for Capacity Augmentation of Nagpur Municipal Corporation	Finance & Accounts	Solid Waste Management	Fire	Town Planning	Public Works Dept.	Health	Education	Estate	Dept. of Tax	General Admin	Transport	Bazar	IT	Law Dept.	Priority Level
Functional Competencies	Administration and Governance Module

5.4 Tentative Annual Training Calendar

Based on the insights received from study of training needs, a suggestive annual training calendar has been prepared for the ULB. The calendar can act as baseline document when a training institution/s is/are onboarded while executing ACBP. The Capacity Building Unit (CBU) set up at the Municipal Corporation will act as nodal agency in this whole exercise. The CBU will be responsible to reach out to the suggested training institutes (but not limited to) and will assess availability of suitable courses or customisation of the trainings courses as per the needs assessment.

5.5 Training Curriculum Expectation

Keeping in mind the different level of proficiencies and varied nature of roles and responsibilities of municipal staff at NMC, a baseline expectation for key training courses have been chalked out to guide the Corporation and Capacity Building Unit in selecting and facilitating training curriculum as well as arranging trainings for the municipal staff.

As given in the tables below, for each topic, details of desired training/course have been mentioned covering key topics to be covered, probable duration of the course, requirement of site visit, etc. The links of the available and relevant online courses have also been provided in each table to facilitate trainings. In addition to this, for each topic, names of the potential training institutions have been listed. The Capacity Building Unit at the Municipal Corporation is delegated with the task to partner with these training institutions as per the training needs and capacity augmentation objective. However, the given list is of suggestive in nature and non-exhaustive. Based on training plan, CBU will have to decide on building partnerships with the given training institutions or engage with any other suitable training partners.

Topic/Area/Theme	Refresher Course on Maharashtra Civil Services Rules- 1979		
Course Objective	To improve comprehensive understanding of the Maharashtra Civil Services Rules- 1979		
Expected Duration	1 Day	Mode: Onsite/Offsite	Exposure visit-NA
5 Main Subjects/Activities to be covered in the Curriculum			
<ol style="list-style-type: none"> 1. Basic overview of Maharashtra Civil Service Rules and their relevance to ULBs. 2. Understanding the constitutional framework and legal provisions governing civil services in Maharashtra. 3. Understanding the rules and procedures for appointment, promotion, and transfer. 4. Study of rules related to leaves, promotion, probation, and retirement. 5. Examination of administrative powers, delegation of authority, and decision-making processes within ULBs. 			
Targeted Departments- All departments			
Online Courses – N. A	Potential Training Institutes: <ul style="list-style-type: none"> • YASHADA, Pune • AILSG, Nagpur 		

Topic/Area/Theme	Refresher course on Maharashtra Municipal Corporations Act, 1949		
Course Objective	To improve comprehensive understanding of Maharashtra Municipal Corporations Act, 1949 and its applicability in the day-to-day activities.		
Expected Duration	1 Day	Mode: Onsite/Offsite	Exposure visit-NA
5 Main Subjects/Activities to be covered in the Curriculum			
<ol style="list-style-type: none"> 1. Brief overview on municipal authority, elections, powers and functions, procedures etc. 2. Summary of organizational structure, appointments, essential services, 3. Understanding of Finance, Accounts and Audits, Property, and relevant sections of the act 4. Regulation of Buildings, Licenses and fee, Taxes, by-laws 5. Penalties, procedures and miscellaneous. 			
Targeted Department- All departments			
Online Courses: NA	Potential Training Institutes: <ul style="list-style-type: none"> • YASHADA, Pune • AILSG, Nagpur 		

Topic/Area/Theme	Refresher Course on Maharashtra Regional and Town Planning Act- 1966		
Course Objective	To improve comprehensive understanding of Maharashtra Regional and Town Planning Act- 1966 to understand the law and its provisions better.		
Expected Duration	1 Day	Mode: Onsite/Offsite	Exposure visit-NA
5 Main Subjects/Activities to be covered in the Curriculum			
<ol style="list-style-type: none"> 1. Brief overview of Maharashtra Regional and Town Planning Act. 2. Understanding the role of NMC in the planning process. 3. Understanding the planning process, preparation of development plans, control rules, and zoning regulations. 4. Examination of the principles and techniques of land use planning, infrastructure development, and environmental considerations. 5. Understanding permissions, licenses, and clearances required for development projects of different kinds. 			
Targeted Departments- Town Planning Department, Public Works Department			
Online Courses: NA	Potential Training Institutes: <ul style="list-style-type: none"> • YASHADA, Pune • CEPT University, Gujrat 		

Topic/Area/Theme	Refresher course on Solid Waste Management Rules- 2016		
Course Objective	To improve comprehensive understanding on waste management policies and rules enforced under Solid Waste Management Rules- 2016

5 Main Subjects/Activities to be covered in the Curriculum			
<ol style="list-style-type: none"> 1. To receive an overview of HRMS software and its role in streamlining HR processes. 2. Learn Employee Data Management 3. Participants will learn how to utilize the performance management module of the HRMS software. 4. To learn payroll processing functionality of the HRMS software. 5. To learn about the integration capabilities of the HRMS software with other systems and applications. 			
Target Department: General Administration			
Online Courses: N.A	Potential Training Institutes: <ul style="list-style-type: none"> • YASHADA, Pune • ASCI, Hyderabad 		

Topic/Area/Theme	Training on Designing Sewerage and Storm Water Drainage		
Course Objective	To design, plan and maintain an efficient sewerage and stormwater drainage systems		
Expected Duration	1 day	Mode: Online / Offline	Exposure visit -NA
5 Main Subjects/Activities to be covered in the Curriculum			
<ol style="list-style-type: none"> 1. Introduction to Sewerage and Stormwater Drainage Systems 2. Activities will focus on the planning phase of designing sewerage and stormwater drainage systems. 3. To learn about hydraulic principles and calculations involved in designing sewerage and stormwater drainage systems. 4. Activities will cover the design of gravity sewer systems. 5. Water Quality Management 			
Target Department: PWD (Drainage)			
Online Courses: NA	Potential Training Institutes: <ul style="list-style-type: none"> • YASHADA, Pune • MCGM Centre for Municipal Capacity Building & Research, Mumbai 		

Topic/Area/Theme	Training on Inventory Management		
Course Objective	To effectively manage inventory and optimize inventory-related processes within the organizations.		
Expected Duration	1 day	Mode: Onsite/Offsite	Exposure visit-Applicable
5 Main Subjects/Activities to be covered in the Curriculum			
<ol style="list-style-type: none"> 1. Introduction to Inventory Management. 2. Inventory planning and forecasting techniques. 3. To learn various inventory control techniques to ensure efficient inventory management. 4. Understanding inventory classification techniques such as ABC analysis. 5. Warehouse Management 			
Targeted Department – Fire, Health			
Online Courses: N.A	Potential Training Partner: <ul style="list-style-type: none"> • IIM Nagpur • VNIT, Nagpur 		

Topic/Area/Theme	Refresher Course on Basics of Finance and Accounts		
Course Objective	To enhance understanding and proficiency in finance and accounting principles.		
Expected Duration	1 day	Mode: Online / Offline	Exposure visit -NA
5 Main Subjects/Activities to be covered in the Curriculum			
<ol style="list-style-type: none"> 1. Overview of the role and importance of finance and accounting in an organization. 2. Understanding financial statements, including the balance sheet, income statement, and cash flow statement. 3. Financial Analysis 4. Costing and Cost Analysis 5. Capital Budgeting 			
Target Department: Finance & Accounts			
Online Courses: NA	Potential Training Institutes: <ul style="list-style-type: none"> • YASHADA, Pune • AIILSG, Nagpur 		

Topic/Area/Theme	Training on transactions under PPP model (Accounts specific)		
Course Objective	To provide comprehensive understanding of concept of Public private partnerships , Project structuring, project life cycles, financial aspects, accounting and cashflow management		
Expected Duration	2 days	Mode: Offline / Online	Exposure visit -NA
5 Main Subjects/Activities to be covered in the Curriculum			
<ol style="list-style-type: none"> 1. PPP Accounting Principles and Standards 2. Financial Structure of PPP Projects 3. Activities will focus on financial reporting requirements for PPP projects. 4. Revenue Recognition in PPP Projects 5. Financial Risk Assessment and Mitigation 			
Target Department: Civil Works, Solid Waste Management, Health, IT, Estate

Topic/Area/Theme	Training on Latest Machineries/Tools/Techniques for Civil Works		
Course Objective	Introduce and enhance understanding of the staff regarding latest machineries/tools/techniques in civil works		
Expected Duration	1 Day	Mode: Offline / Online	Exposure visit -Preferable
5 Main Subjects/Activities to be covered in the Curriculum			
<ol style="list-style-type: none"> 1. Basic overview of the latest machinery and tools used in civil works. 2. Understanding the safety guidelines and best practices for operating and maintaining the latest machinery and tools. 3. Understanding innovative construction practices. 4. Introduction to digital technologies and automation solutions for civil works. 5. Analysing real-life case studies, practical demo to grasp concepts. 			
Target Department: PWD			
Online Courses: https://onlinecourses.nptel.ac.in/noc23_ce46/preview https://igotkarmayogi.gov.in/Concrete Technology	Potential Training Institutes: <ul style="list-style-type: none"> • VNIT, Nagpur • NICMAR, Pune 		

Topic/Area/Theme	Training on Construction Quality Control Testing, Systems and Standards		
Course Objective	To improve understanding and knowledge of quality control in construction, effective quality control measures, conduct construction material testing and adhere to relevant quality standards		
Expected Duration	1 Day	Mode: Onsite/Offsite	Exposure visit-NA
5 Main Subjects/Activities to be covered in the Curriculum			
<ol style="list-style-type: none"> 1. Brief overview on construction quality control in ensuring project success. 2. Recapitulation of the various methods used in construction quality control, such as material testing, concrete testing, soil testing etc. 3. Hands on training on conducting construction quality tests. 4. Understanding various relevant national and international standards of construction quality control. 5. Understanding quality control audits to assess compliance with established rules and standards. 			
Target Department: PWD, Town Planning			
Online Courses: N.A	Potential Training Institutes: <ul style="list-style-type: none"> • IIT Bombay • NICMAR, Pune 		

Topic/Area/Theme	Training on - SCADA Systems		
Course Objective	To enhance skills to effectively operate and manage SCADA systems.		
Expected Duration	1 Day	Mode: Onsite/Offsite	Exposure visit-NA
5 Main Subjects/Activities to be covered in the Curriculum			
<ol style="list-style-type: none"> 1. Brief overview of SCADA systems and their role. 2. Understanding the principles of designing and configuring SCADA systems to meet specific requirements. 3. Understanding SCADA Communication protocols. 4. Understanding operating and monitoring SCADA systems. 5. Understanding the importance of cybersecurity in SCADA systems and protecting critical infrastructure. 			
Targeted Department – PWD

Topic/Area/Theme		Training on New Approaches in Pedagogy	
Course Objective		To equip the staff with innovative and effective teaching methods and pedagogical approaches that enhance learning outcomes and promote active engagement among students.	
Expected Duration	1 day	Mode: Online / Offline	Exposure visit -NA
5 Main Subjects/Activities to be covered in the Curriculum			
<ol style="list-style-type: none"> 1. Understand different learning styles and their impact on student engagement and academic performance. 2. Explore the benefits of integrating technology into the classroom and its impact on student motivation and achievement. 3. Define project-based learning (PBL) and experiential education and their significance in promoting student engagement and deeper understanding. 4. Understand the principles of active learning and its positive impact on student motivation, retention, and conceptual understanding. 5. Understand the purpose and types of formative and summative assessments and their role in informing instruction and monitoring student learning. 			
Target Department: Education			
Online Courses: N.A		Potential Training Institutes: <ul style="list-style-type: none"> • School of Education, TISS, Mumbai 	

Topic/Area/Theme		Course on Child Psychology	
Course Objective		To equip the staff with knowledge and skills to interact and engage with the children in various municipal programs and services.	
Expected Duration	1 day	Mode: Online / Offline	Exposure visit -NA
5 Main Subjects/Activities to be covered in the Curriculum			
<ol style="list-style-type: none"> 1. Understand different learning styles and their impact on student engagement and academic performance. 2. Explore the benefits of integrating technology into the classroom and its impact on student motivation and achievement. 3. Define project-based learning (PBL) and experiential education and their significance in promoting student engagement and deeper understanding. 4. Understand the principles of active learning and its positive impact on student motivation, retention, and conceptual understanding. 5. Understand the purpose and types of formative and summative assessments and their role in informing instruction and monitoring student learning. 			
Target Department: Education			
Online Courses: N.A		Potential Training Institutes: <ul style="list-style-type: none"> • Maharashtra Institute of Mental Health, Pune • School of Human Ecology, TISS, Mumbai 	

Below is a list of select relevant trainings available on the iGOT platform (<https://igotkarmayogi.gov.in/>). The Municipal Corporation can nominate their employees to undertake these trainings as per the training needs and requirements.

Sr. No	Title of the Course
1	Judicial Review and How to Read Judgement
2	Orientation on Faecal Sludge and Septage Management
3	Budget
4	Fundamentals of Geographic Information System
5	Operation and Maintenance of Effluent Treatment Plants
6	Basics of Administrative Law
7	Low Carbon Development: Planning & Modelling
8	Energy Efficiency in Public Buildings
9	Economics of Climate-Resilient Development
10	Cyber Security and Strategy
11	Smart Metering
12	Management Fundamentals in Government Services
13	Bid Participation
14	Sustainable Renewable Energy Technologies
15	Ways of Enhancing Presentation Skills

**Recommendations for
Institutional and Organizational
Capacity Building**

6. Recommendations for Organizational and Institutional capacity Building

Organizational capacity building refers to the process of enhancing an organization's ability to effectively achieve its mission and goals by improving its internal systems, processes, and capabilities. It involves strengthening an organization's capacity to plan, implement, and evaluate its programs and initiatives as well as its ability to adapt to changing circumstances and challenges. Organizational capacity building envisions building the capacity of the collective and shared aspects of the organization such as existing processes, physical and digital infrastructure, technological abilities, etc. (CapacityBuildingCommission, 2022).

On the other hand, Institutional capacity building typically refers to strengthening the abilities and resources of an entire institution. It often involves broader systemic changes, including improving governance structures, introducing/amending policies, and regulations that guide the functioning of individuals and organizations.

Organizational capacity building can be achieved through various methods, such as training and skill development, mentoring and coaching, process improvement initiatives, procedure development, and fostering a learning culture within the organization. However, in the case of institutional capacity building, structural changes are required in terms of resource allocation, devolution of power, regulation, governance structure, etc. Institutional capacity building activity is mainly driven through a policy action and as it has impact over the government as a whole, more nuanced approach and deeper understanding are required.

Overall, institutional and organization capacity building of any urban local bodies is a long-term process that requires sustained investment and commitment from various stakeholders. Following are a few recommendations emerged from the observations noted during the interactions with employees and survey of the Municipal Corporation.

Recommendations	Needs	Responsibility
Addressing Shortage of Manpower	The Municipal Corporation is highly understaffed and working with high vacancy rate. As many officials have been given additional charges of other departments/duties, due to lack of technical know-how and nitty-gritties, the overall efficiency of service delivery is being hampered. In order to address this, a revision of establishment structure of the municipal corporation needs to be undertaken at the earliest. In addition to	Municipal Corporation / State Government

Recommendations	Needs	Responsibility
	<p>this, a clarity in the policy needs to be achieved regarding factors (population, geographical expanse, topography, etc.) influencing sanctioned strength of the Municipal Corporation.</p>	
<p>Introduction of 'Induction Module' for new joiners / officials transferred from different departments.</p>	<p>Municipal officials and staff have very vast scope of work and responsibilities. They perform many administrative as well as technical functions on a daily basis. In order to perform efficiently, in addition to job specific knowledge, they will have to be aware of various legal and regulatory frameworks, departmental procedures, safety and emergency protocols, organizational culture and values, etc.</p> <p>It is important that the municipal staff is well-informed, prepared, and equipped to contribute effectively to the organization's goals and objectives. Induction trainings provide new employees with essential information about the organization, its structure, functions, and policies. It helps familiarize them with the goals, objectives, and values of the municipal corporation, ensuring that they understand their roles and responsibilities within the organization.</p>	<p>Municipal Corporation</p>
<p>Policy/Practise of 'Knowledge Transfer'</p>	<p>Inter service and inter departmental transfers is a common practise identified in the ULBs. Due to absence of practise of 'Knowledge</p>	<p>Municipal Corporation</p>

Recommendations	Needs	Responsibility
	<p>Transfer' or policy/practise regarding the same, the legacy knowledge gained by the individual in the particular department is not passed on and thus hampers the process of succession and improvement. It also leads to delays, undesirable exposure to the risks and overall decline in the service levels until the successor get the grasp of the scope.</p> <p>For organizational effectiveness, innovation, risk management, employee development, and long-term success, ' Knowledge Transfer' program is essential. It facilitates the efficient utilization of resources, promotes a learning culture, and enables organizations to adapt and thrive in a rapidly changing environment.</p>	
<p>Documentation and revision of Roles and Responsibilities</p>	<p>Defined roles and responsibilities are crucial for the effective functioning of the municipal corporation. They provide clarity, structure, and accountability, ensuring that everyone understands their specific duties and how they contribute to the overall goals and objectives of the organization.</p> <p>Owing to changing times and growing complexity of urban governance, roles & responsibilities of the municipal officials and staff need to be revised and updated. Well codified roles and responsibilities enhance efficiency, productivity, and collaboration along with enabling effective performance management and adaptability.</p>	<p>Municipal Corporation</p>

Recommendations	Needs	Responsibility
<p>Update and revise the internal Standard Operating Procedures of each department</p>	<p>Standard Operating Procedures (SOPs) play a critical role in organizations across various industries. They are documented guidelines that outline the steps, processes, and best practices required to perform specific tasks or activities. SoPs are important for consistency & quality, efficiency & productivity and training & onboarding of new employees. Although the corporation has SoPs for each department, there is a need for upgradation to include new tools, techniques and procedures.</p>	<p>Municipal Corporation</p>
<p>Formation of HR Cell</p>	<p>Over the years the field of human resource management has changed significantly. Many new methods and practices have been developed and adopted by the organisations which are yielding better outcomes. Owing to the circumstances, it is critical for the ULB to manage its human resource efficiently. In order to do that a HR cell can be formed at the Municipal Corporation on pilot basis for a year. The cell can handle the recruitment and selection process for contractual employees, set their KPIs and track progress. For permanent staff, a career progression plan will be made. It will give clarity to the staff about their career goals, encourage skill development and lead to better engagement.</p>	<p>Municipal Corporation</p>
<p>Dedicated procurement section for tendering</p>	<p>Procurement is a critical function of the Municipal Corporation. Swift, efficient and transparent procurement can lead to improved service delivery as well as optimum use of resources. The process of procurement in the corporation is guided procurement rules and polices of the centre as well as</p>	<p>Municipal Corporation</p>

Recommendations	Needs	Responsibility
	<p>state government. In addition to this, due to advent of technology, e-procurement through specific web portals such as Mahatenders, GeM, website of the corporation, etc. have become standard practise.</p> <p>In such a scenario, a dedicated section for the procurement needs to be established. The section will be consisting of procurement experts who will carry out the procurement process, in coordination with the concerned department, efficiently.</p> <p>This section will stay updated with the requirements, ensuring that all tendering processes align with the legal framework and meet local government standards. The procurement section for tendering will also ensure that the NMC is better equipped to negotiate and gets the best value for money.</p>	
<p>Digitalization of Historical Data</p>	<p>Municipal corporations often need to retrieve historical data for various purposes, such as legal inquiries, research, urban planning, or heritage preservation. Digitizing historical data allows for quick and efficient retrieval, eliminating the time-consuming process of manually searching through physical records or archives. It enables employees to access and extract relevant information promptly, enhancing decision-making processes.</p>	<p>Municipal Corporation</p>
<p>Implementation of e-Office</p>	<p>By implementing e-Office, municipal corporations can streamline their administrative processes, enhance transparency, reduce paperwork, improve accessibility to information, and increase overall efficiency. It also supports the goal of digital governance and enables better citizen services through faster response times and improved access to municipal services and information.</p>	<p>Municipal Corporation</p>

Recommendations	Needs	Responsibility
<p>Implementing Project Management Dashboard</p>	<p>Municipal corporations typically handle multiple projects simultaneously, ranging from infrastructure development to community initiatives. Dashboards allow project managers and municipal authorities to monitor and track the progress of various projects from a centralized platform. This ensures efficient resource allocation, minimizes delays, and optimizes project outcomes.</p>	<p>Municipal Corporation</p>

Capacity Building Unit

7. Capacity Building Unit-Role and Responsibilities

To institutionalise the whole activity of capacity building and make it a long-term continuous program instead of one-time activity, a Capacity Building Unit (CBU) has been set up at the Municipal Corporation. The CBU will take efforts in operationalizing the competency framework, developing content, curating assessments etc. and will work closely with Capacity Building Commission. CBU consists of a team of individuals, having the required knowledge and skills in the domain of capacity building so that they can carry out the capacity building (training/organisational) related activities in a continuous manner and standardize and institutionalize the training management processes in the Municipal Corporation.

Implementation of the Annual Capacity Building Plan of the Municipal Corporation

- Identifying anchor institute and partner institutions, preparing relevant MoUs to ascertain pricing and provision of other resources.
- Identifying appropriate training delivery models, including web-based e-learning, in-person or blended learning.
- Preparing approximate cost estimates and resource requirements (time, institutional, financial, etc.) associated with capacity building.
- Update the training needs and training calendar.
- Support the rollout of training programs and all allied activities identified in the ACBP.
- Ensure onboarding of personnel onto iGOT KY, training them in how to use platform and other associated tools.
- Cost analysis for training requirements

Preparation of ACBP for the Next Year and its Execution

- Update training needs as per defined roles and responsibilities.
- If required, revised competency mapping and skills sets required.
- Benchmarking internal needs for capacity building
- Based on the inputs prepare a ACBP and a fresh annual training calendar for the new year.
- Share the ACBP with CBC for guidance and suggestions.
- Renew the engagements with training institutes.
- Coordinate with all the stakeholders (training institutes/knowledge partners) to implement ACBP.
- Execute training program and supervise and monitor on regular basis.
- Reporting and updating progress of the ACBP plans to respective Municipal Commissioner/HODs/Concerned Authorities.

Monitoring and Evaluation of Capacity Building Interventions

- Training the leadership of corporation in using the monitoring and evaluation tools available through iGOT KY - MDO dashboard, PM's dashboard etc.
- Establishing internal customized indicators of success that may not be covered by platform dashboards.
- Establishing mechanisms for measurement and reporting of pre-defined indicators
- Presentation of a comprehensive evaluation of capacity building interventions by the corporation for necessary guidance to CBC
- Support preparation and execution of the L&D Survey in keeping with Mission Karmayogi's mandate of efficiency, transparency and accountability.
- Facilitate the collection and collation of data related to capacity building interventions, required for the ACBP.

Key Responsibilities of CBU

Potential Training Partners

8. Potential Training Partners

This exercise aims at assessing existing capacities at the ULB, conducting training need analysis and based on the insights received preparing an Annual Capacity Building Plan for the ULB. The prepared ACBP document acts a guiding principle for the Capacity Building Unit which will undertake, supervise and monitor the whole capacity building exercises.

To design/organise/plan training programs for the municipal officials, the CBU will have to build partnerships with institutions imparting trainings or conduct courses on the relevant subjects. To assist the CBU in this, a list of potential training partners has been prepared as mentioned in the [Annexure III](#). The list consists of local/state level and national level institutes which are providing/running number of courses in the relevant areas. The list also consists of academic institutions with which ULB may get associated to design and arrange some of the specialised courses for its staff. It is to be noted that the given list is non-exhaustive and suggestive in nature. The CBU will have to facilitate these partnerships between the Municipal Corporation and training institutions as per the suitability and requirements.

Along with this, it is to be highlighted here that in current times, the whole sector of training has been unbundled. Nowadays, trainings/workshops/courses can be designed/arranged through NGOs/think tanks, Subject Matter Experts, Independent Consultants, Retired Senior Government Officials, Academic Institutions, Online Education Platforms, etc. Keeping this in mind, it is suggested that CBU and in turn the Municipal Corporation to conduct its own assessment and partner with suitable training institutions or engage with independent experts.

Opportunities for Immersing Learning

9. Opportunities for Immersing Learning

One of the important aspects in this capacity building framework is to build partnerships among ULBs and provide opportunities for cross learning. Accordingly, Nagpur Municipal Corporation has shown willingness to impart trainings and share its experiences in following domains/key projects.

Features	Description
Efficient water management System	<p>Nagpur Municipal Corporation (NMC) has implemented various measures to ensure efficient water supply and distribution-</p> <ol style="list-style-type: none"> 1. Installation of automated meter reading (AMR) systems to monitor water consumption, reduce wastage, and identify leakages. 2. It is mandatory for all new buildings to have rainwater harvesting systems. 3. Nagpur has a comprehensive water quality monitoring system in place to ensure the safety and potability of drinking water. 4. Nagpur has engaged in public-private partnerships (PPPs) for the management and operation of water supply and distribution systems. This collaboration between the municipal corporation and private entities aims to improve service delivery, optimize infrastructure, and enhance overall efficiency in water-related services.
Geo Civic Property Tax system	<ol style="list-style-type: none"> 1. NMC provides an online platform for property owners to pay their taxes conveniently. The online system allows property owners to calculate their tax liability, generate tax bills, and make payments. 2. Nagpur utilizes Geographic Information System (GIS) technology to map and digitize property data. GIS-based property mapping helps in accurate identification and assessment of properties. 3. Each property in Nagpur is assigned a Unique Property Identification Number (UPIN). Through this one get to know the current property demand. NMC has made 11 services available only related to property Tax.

Quick Win Plans

10. Quick Win Plans

- 1. Partnering with Local Mentor Training Institution:** To enhance the skills and knowledge of the NMC officers and staff through the Annual Capacity Building Plan, a mentor training institute is required to facilitate the capacity-building process. We propose a collaboration of NMC with the YASHADA., to pursue this goal. YASHADA can offer cutting-edge training programs in key areas designed to optimize competence and enhance the skills of NMC employees to achieve the goal of ideal governance.
- 2. Partnering with National Institutes:** Maharashtra is known for its premier institutions in the field of Urban Studies and Planning. Additionally, it houses many Institutes of National Importance, such as IIT Bombay, NEERI and IIM Nagpur, among others. We recommend the collaboration of CBC with these institutes and other nationally acclaimed institutes, such as the NICMAR, AIILSG, IIT Bombay, TISS Mumbai, etc. to design courses per the NMCs skill needs. The CBC will facilitate the onboarding of these institutes by creating MoUs. Therefore, it would be prudent to explore opportunities to partner with these institutions at the earliest possible. Such partnerships could take place at two levels: first, by providing existing relevant and appropriate courses immediately available to the ULB staff, and second, by designing customized courses that are specific to the functions of urban local bodies in collaboration with these institutes.
- 3. Registration on IGOT Platform:** The iGOT platform is offering top 3 courses in demand i.e. MS office, Emerging Technologies and Stress Management. The NMC is requested to register its officials on this platform. It is advised that all the group A,B and C staff (non-contractual) to be registered on IGOT platform to undergo above 3 mentioned trainings.
- 4. Leveraging Local NGOs/CSOs:** It has been observed that many NGOs/Thinktanks are working with urban communities. Since they have experience in citizen engagement and community participation, options of engaging them as training provider for training on dealing with public, awareness campaign designing etc, will be beneficial for NMC.
- 5. Partnering with Private firms who are providing IT or Construction solutions as training providers:** NMC can consider exploring opportunities to partner with reputed industry players offering training on solutions or technologies such as AutoCAD, BIM, SCADA, Property Taxation, and other relevant areas. The NMC can avail the benefits of its expertise, resources, and experience to equip its staff with the necessary skills and knowledge in these identified technologies, contributing to the city's overall development.

Annexures
